REGULAR EXPRESSIONS

Regular Expressions

- Regular expressions are a powerful language for matching text patterns.

Regular Expressions

```
import re
text = "The author's name is Porter"
result = re.search("^The.*Porter$", text)
if result:
    print("ok!")
else:
    print("Nop...")
```

Regular Expressions

findall - Returns a list containing all matches

search - Returns a Match object if there is a match anywhere in the string

split- Returns a list where the string has been split at each match

sub- Replaces one or many matches with a string
