Objectives:

- **Conducting a Systematic Bibliographic Search.**
- **The 'EBSCO Discovery Service'.**
- **Creating an 'Article Matrix' as a tool for systematizing information.**
- **The link between search, systematization and TFM**

LITERATURE REVIEW

What we want in a Literature Review (Bryman, 2012)

- **Relevant concepts and theories on the topic.**
- **Research strategies and methods in commonly used to research similar topics.**
- **Assess facts with evidence (relative) in studies on the topic.**
- **Assess if there are methodological inconsistencies in produced evidence.**
- **Assess if there are research questions without an answer.**

Research Methods and Masters Project

From topic to literature review

- **A series of steps**

Systematic Bibliographic Search

Systematic Bibliographic Search

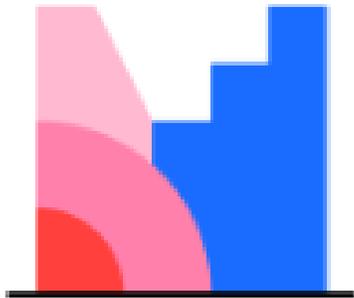

Where should I start?

Step 1: Keywords to guide your systematic Search

- i. Identifying key concepts for the Masters Project
- ii. Look for synonyms, similar concepts and abbreviations in annotated bibliography

	PART OF THE ANNOTATION	EXAMPLE
1	Reference Citation information in same format as required in Reference List	Griffiths, T. (1996). Hunters and collectors: The antiquarian imagination in Australia. Cambridge University Press.
2	Statement Short statement of author's viewpoint.	<ul style="list-style-type: none"> • <i>The authors describe...</i> • <i>The author's purpose is to challenge...</i>
3	Describe Short summary of theory, research findings or argument.	<ul style="list-style-type: none"> • <i>The main ideas expressed are...</i> • <i>The author's research focuses on...</i>
4	Comment Comment on usefulness/limitations of article/text for your research.	<ul style="list-style-type: none"> • <i>The writing style considers a range of audiences...</i> • <i>There is a lack of supporting evidence...</i> • <i>The main limitation of the website...</i>
5	Evaluate Evaluate the article/text, taking into account how it will fit into your research on a topic.	<ul style="list-style-type: none"> • <i>This article is useful for the research topic...</i> • <i>It is relevant to the thesis because...</i>

Step 2: Sources

NON-SCIENTIFIC LITERATURE

- i. Grey Literature;**
- ii. Newspapers and Magazines;**
- iii. Web;**

SCIENTIFIC LITERATURE

- **Primary Sources**
 - **Articles/Books with original empirical data/findings**
- **Secondary Sources**
 - **Articles/Books based on evidence from other sources:**
 - **Manuals;**
 - **Literature Reviews**
 - **Systematic Literature Reviews**
 - **Meta analysis**

Step 2: Sources

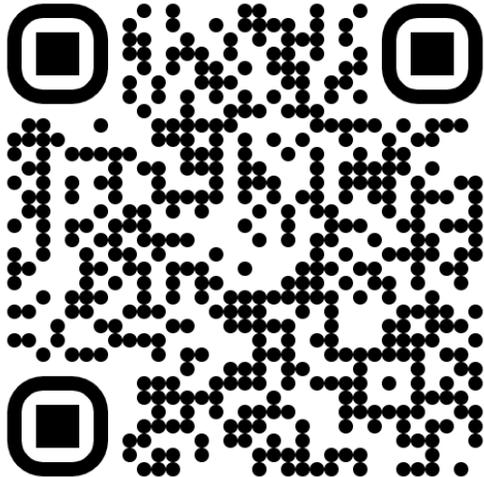

- **A systematic bibliographic search should be based exclusively on scientific literature and primary sources.**
- **However – there is non peer-reviewed scientific evidence that should not be used:**
 - **PhD theses;**
 - **Master dissertations;**
 - **Conference papers;**
 - **Unpublished papers even if posted in public repositories (SSRN, arXiv, etc.).**

Step 3: Define further search parameters

- **Search fields:** ex. 'Title', 'Abstract', 'Title and Abstract', etc.;
- **Date:** ex., '2000 – present';
- **Language:** ex., 'English' (according to preference/need);
- **Area:** ex., 'Management'; 'Sustainability'

Step 4: EBSCO discovery service at ISEG.

Catalog

The library promotes the collection, processing, and dissemination of bibliographical information, support for pedagogical and scientific actions, and exchanges with national, foreign and international counterparts.

The Library was founded with the inauguration of the School in 1911 - then known as School of Commerce - in the Rua do Quelhas building. Its initial content consisted of 650 volumes. The Francisco Pereira de Moura Library has been added to over the years, and today it has one of the best collections in the country in the fields of Economics, Management, and Associated Sciences. The Library hosts the ISEG - based European Documentation Center of Universidade de Lisboa. Moreover, the library also made an agreement with the World Bank. It became the Depository Library of publications. The bibliographic catalog allows the research of the existing information in the Library, being also possible the access to several information systems online. The library building has 5 floors, 3 reading rooms offering 300 seats.

The screenshot shows the EBSCO Discovery Service search interface. At the top, there is a navigation bar with links for 'New Search', 'Publications', and 'Página inicial'. On the right side of the navigation bar, there are links for 'Preferences', 'Language', and 'Help'. Below the navigation bar, the search area is titled 'Pesquisa: Discovery Service para a Universidade de Lisboa'. The search input field is empty, and there are three dropdown menus for selecting search fields, each with a 'Select a Field (optional)' label. A 'Search' button is located to the right of the first dropdown. Below the search input, there are two 'AND' operators and two more search input fields, each with a 'Select a Field (optional)' label. A 'Clear' button and a help icon are also present. Below the search area, there are links for 'Basic Search', 'Advanced Search', and 'Search History'. The 'Advanced Search' link is highlighted. Below the search area, there is a 'Search Options' section. The 'Search Modes and Expanders' section contains three radio buttons: 'Boolean/Phrase', 'Find all my search terms' (which is selected), and 'Find any of my search terms'. There is also a 'SmartText Searching' option with a 'Hint' link. The 'Apply related words' checkbox is unchecked. The 'Also search within the full text of the articles' checkbox is checked. The 'Apply equivalent subjects' checkbox is checked. The 'Limit your results' section contains three checkboxes: 'Full Text' (unchecked), 'Available in Library Collection' (unchecked), and 'Published Date' (unchecked). The 'Academic (Peer-Reviewed) Journals' checkbox is unchecked. The 'Journal Name' field is empty. There is a 'Reset' button in the top right corner of the 'Search Options' section.

IMPORTANT

A satisfactory bibliographic sample:

- Identifies relevant evidence about our topic;
- Gives us several articles/books we can feasibly read/analyse.

The screenshot shows a search results page from the University of Lisbon's Discovery Service. The search terms are 'Training' and 'Retention'. The results table is highlighted with a red box and contains the following information:

Below the table, the first result is displayed: '1. A Study on the Analysis of Training and Retention Strategies in some selected IT sectors at Odisha'. The author is listed as 'By: Padhi, Amarnath; Mitra, Anirban; Paul, Subrata'. The publication is from the '2020 International Conference on Computer Science, Engineering and Applications (ICCSEA), 2020 International Conference on...: 1-5 Mar. 2020; IEEE Language: English. Before reaching a satisfactory bibliographic sample we need to go through an interactive process of widening and narrowing of the search terms.

The screenshot shows a web browser window displaying a search results page from the University of Lisbon's Discovery Service. The search terms are 'Training AND Retention'. The interface includes a search bar, navigation links, and a list of search results. A red box highlights the search options and the first result.

Step 5: Select articles and archive them

- Ordering or referencing software (ex. [Mendeley](#)).

Step 6: Systematize evidence

- **Using an Article Matrix**

Mauldin e DeCarlo, SD

You will have a lot of very diverse articles to use so it is useful to systematize the information:

The literature review:

- With all the information systematized you can write the literature review
- It is a narrative, where you tell the story of what has been said about the topic and how it relates to your research question/hypothesis or argument (gap in the literature, further inquiry on a topic, specific line of study, etc.)
- The literature review set the background for the development of your work on the topic you choose in any of the modalities of Masters' Project you Choose.

How to write a literature review

 Scribbr

The literature review:

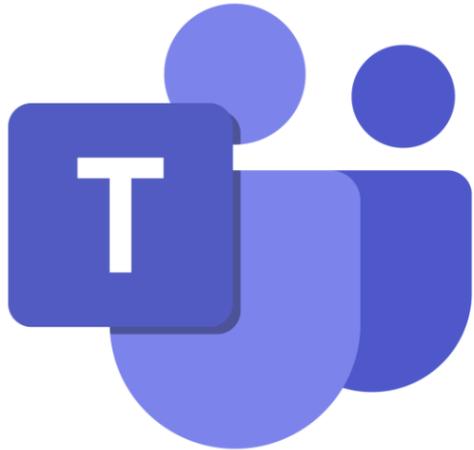

- Overview and your topic
- Research question/objective of review
- Organize literature (dates, subject, concepts, etc. - remember **article matrix**)
- Identify gaps, inconsistencies and contradictions (remember the **annotated bibliography** and the **critical reading**)
- Identify weaknesses or limits of studies used
- Summarize and conclude – implications, gaps, further research...
- Your MP's place within this literature configuration – what literature/conceptual challenge are you responding to?
