

DATA SCIENCE PROJECT DEVELOPMENT

Carlos J. Costa, ISEG

Context

 Data Science includes techniques developed in some traditional fields like artificial intelligence, statistics or machine learning.

Aparicio et al.(2019).

JECT IAGEMENT

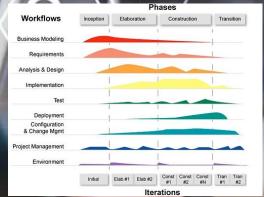

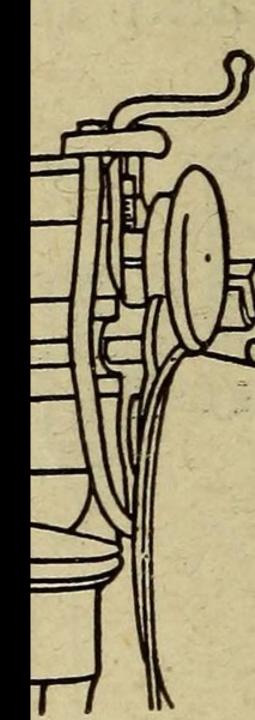

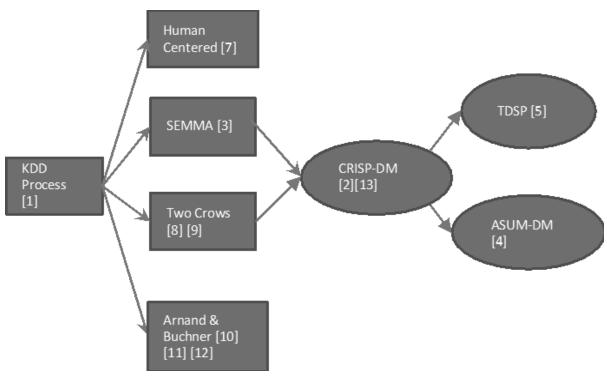

Context

methodology that may contribute to the improvement of the knowledge creation outputs.

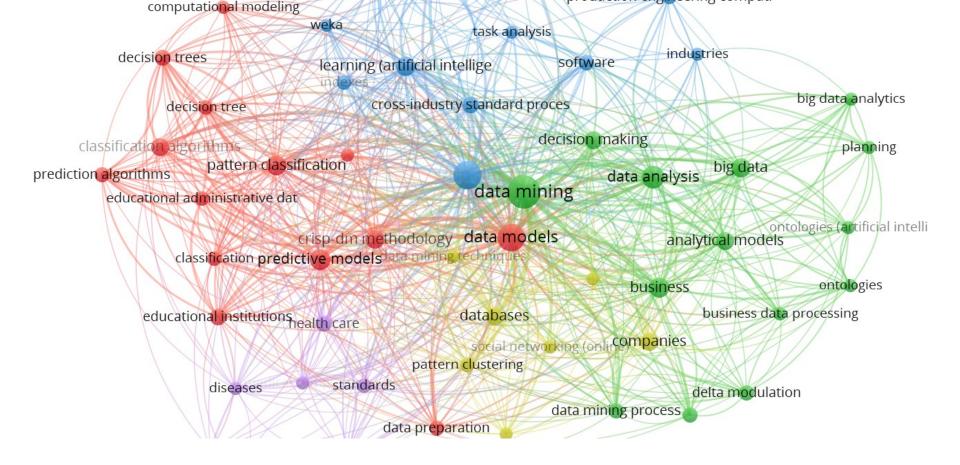

Related Work

Process

Costa & Aparicio (2020)

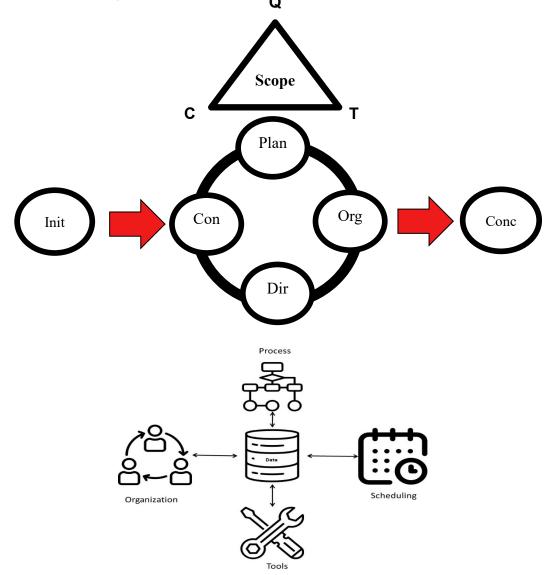

Related Work

Costa & Aparicio (2021)

Related Work

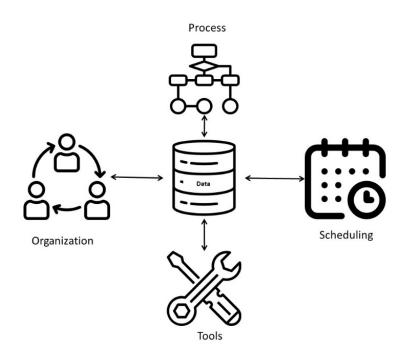

- Summarizing, the approaches related to data mining, machine learning and data science may be interrelated.
- CRISP-DM is one of the most used and the one that inspired many other approaches.
- Nevertheless, other features may be added to this approach:
 - Organization
 - Scheduling
 - Tools

Proposing a Model

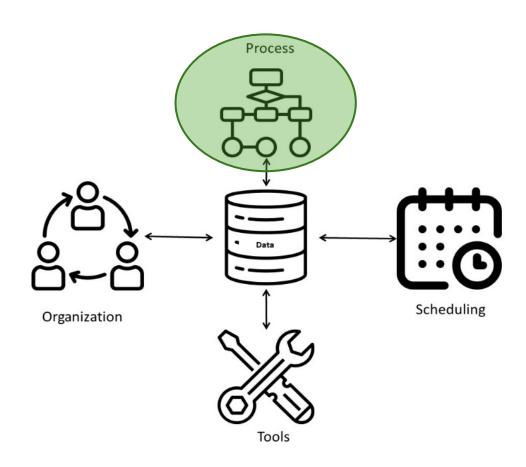

Proposing a Model

Conclusions

- Adequate Approach
- Many roles and people with different backgrounds
- Improve organization contribution
- Improve scheduling
- Allows results vs. expectations adjustment
- Main limitation: Bureaucracy
