Marketing Research Sampling Plan – Types of Samples

Probability Sample	
Simple random sample	Every member of the population has a known and equal chance of selection
Stratified random sample	The population is divided into mutually exclusive groups and random samples are drawn from each group
Cluster (area) sample	The population is divided into mutually exclusive groups and the researcher draws a sample
Nonprobability Sample	
Convenience sample	The research selects the easiest population members
Judgment sample	The researcher uses their judgment to select population members
Quota sample	The researcher finds and interviews a prescribed number of people in each of several categories
