The following grammar explanations and exercises use the terminology that I use in class. Other grammars that you consult will probably use different terms to talk about the same thing and approach the topics in different ways.

The order of the topics is not necessarily from the easiest to the most difficult. Use the table of contents to help find the topics that you need.

Some useful websites for extra grammar practice are:

| | OTHER | | |
| Spelling | responsible | responsible | |
| Lexical + prep(osition) | application to this job | application for this job | |
| Comparative / Superlative form | my responsibility was to sell many products as possible | my responsibility was to sell <u>as many</u> products as possible | |
| Punctuation | I'm sure that <u>i</u> will do a good job. | I'm sure that <u>I</u> will do a good job. | |
| | SENTENCE STRUCTURE & ABOVE T | | |
| Word order | I speak fluently English | I speak English fluently | |
| Parallel structure (and, or, but) | The situation requires thinking about the questions and find suitable answers quickly. | The situation requires thinking about the questions and finding suitable answers quickly. | |
| Run-on sentence Sentence too long | Besides my mother tongue, Portuguese, English language has been present in my life since my early years as well, have the FCE and CAE, my degree is entirely taught in English by my own personal choice and have done an exchange program this past semester in University of Birmingham, UK (awarded by The Times and The Sunday Times good University guide the University of the Year 2014). | Besides my mother tongue, Portuguese, English has been present in my life since my early years. have the FCE and CAE, and my degree is entirely taught in English by my own personal choice. Furthermore, my interest in languages led me to participate in an exchange program this past semester; I studied at the University of Birmingham, UK. | |
| Sentence too long Break sentence here * Reformulate Theme if necessary. | During the summer breaks from university and at least once a week I work in my father's company and I have to introduce data in the computer* while only having limited time to do it, besides that I also have to attend the customers which gave me a good experience in dealing directly with the clients and also an easier feeling while working in high pressure or fast paced environments. | During the summer breaks from university and at least once a week I work in my father's company, introducing data in the computer. Because this work must be done in a limited time, I have learnt to work well in high pressure or fast paced environments. In addition, I attend customers, which has given me good experience in dealing directly with different kinds of clients. | |

| Code | Example | Revision | |
|--|--|--|--|
| COHERENCE | | | |
| (Awkward) Information flow / Thematic choice | What is more, other pictures show molecules, which we could see in the first campaign, but these ones are more real, greener, and they have something liquid | What is more, other pictures show molecules, which we could see in the first campaign, but these ones are more real, greener, and they | |
| Reformulate Theme | inside. It is a symbol of even more serious research. | have something liquid inside. They symbolise even more serious research. | |
| | It's a very positive campaign, showing they are committed to driving their company's energy to every single person, independently of their colour, age or job. This is an advertisement campaign more turned to people, unlike the last one. | It's a very positive campaign, showing they are committed to driving their company's energy to every single person, independently of their colour, age or job. <u>Unlike</u> the last campaign, this one is more turned to people, | |
| Reference | Society had to adapt to this important resource when <u>is</u> price went up. | Society had to adapt to this important resource when its price went up. | |
| | the company goes far away to bring new energy sources to them clients. | the company goes far away to bring new energy sources to their clients. | |
| Unclear reference | The first campaign shows us a working brain. This suggests that they are creative and ground breaking. | The first campaign shows us a working brain. This suggests that the company is creative and ground breaking. | |

BELOW THE CLAUSE

Nominal Group (NG) structure

| | | PRE-MODI | FICATION | | HEAD NOUN | POST- MODIFICATION |
|----------|---------------------------|--------------------------------------|-----------|-------------|------------------|--|
| Function | Deictic | Numerative | Epithet | Classifier | <u>HEAD</u> | Qualifier |
| Form | Determiner/ Possessive | Number/ quantifying expression | Adjective | Noun | <u>NOUN</u> | Prep. phrase Relative clause Non-finite clause |
| Example | the | six | biggest | recruitment | <u>companies</u> | in the world |

PRE-MODIFICATION

1. The Deictic situates the head noun (underlined) with regard to the speaker/writer's expectations about the listener/reader's knowledge of whether the participant is specific/general or known/not known. Words from different word classes can function as deictic. A deictic can be singular, plural or Ø

an <u>opportunity</u>; **these** <u>opportunities</u>; \emptyset <u>experience</u>, \emptyset cultural <u>differences</u>; **my** <u>sense</u> of responsibility; **the** <u>combination</u> of my academic profile and my social skills **another** <u>reason</u>; **other** <u>reasons</u>

When the possessor is animate (e.g. human) or the name of a country, town, organisation, or company, use 's

people's <u>likes</u> and <u>dislikes</u>; **IBM's** <u>decision</u>; the **firm's** marketing <u>research</u> Company names usually take Ø.

OPEC; Shell; Chevron

- 2. The Numerative can be a number or a quantifying expression
 - a lot of younger students; the set of skills
- **3.** The Epithet describes or evaluates the Head Noun. It is typically an adjective.

Adjectives are never plural.

my **strong** academic <u>background</u>; several **different** <u>people</u>; **foreign** <u>cultures</u>; an **interesting** job <u>opportunity</u>; **new** <u>responsibilities</u>; **multicultural** <u>teams</u>;

Epithets can be modified by adverbs.

an incredibly strong academic background; a very interesting job opportunity

4. The Classifier assigns the Head Noun to a class, i.e. what kind of thing is it? It is typically a noun and singular.

the **energy** <u>sector</u>; **communication** <u>skills</u>; a **job** <u>application</u>; **job** <u>opportunities</u>; a **flagship** <u>store</u>; **business** <u>exposure</u>;

exceptions: the futures stock market; a telecommunications satellite; an accounts manager

POST-MODIFICATION

Regardless of its form, a post-modifier functions as a Qualifier to the head noun. A qualifier provides further information/specification about the head noun. There are 4 different types.

1. A Prepositional Phrase can tell us more about the head noun. It is formed by a preposition and a nominal group. The preposition does not have to be 'of'.

| preposition | nominal group |
|----------------|------------------|
| in/for/of etc. | new technologies |

<u>interest</u> in financial markets; an <u>opportunity</u> for improvement; <u>application</u> for the <u>position</u> of Business Development Executive an <u>interest</u> in travelling; a <u>file</u> on recruitment practices;

the first 11 <u>pages</u> of Google results; vice <u>president</u> of human resources; <u>fear</u> of public opinion

Information in the Qualifier can be essential or non-essential to the meaning of the NG. Non-essential information is surrounded by commas (,) and the nominal group is typically known (presuming participant).

Many volunteers have been busy helping to clean up the oil spill on the coast near the southern port city of Yeosu in South Jeolla Province. The <u>volunteers</u>, in protective clothing, dustproof masks and gloves, scooped up and wiped oil off the rocks along the coast. (that the volunteers are wearing protective clothing, dustproof masks and gloves is not essential information. It could be left out.)

The latest costly <u>addition</u> **to Shell's production capacity** comes despite Van Beurden's repeated pledges on climate change. (essential information for the meaning)

Staff at a BP-owned oil <u>rig</u> in the North Sea were forced to evacuate after an unmanned barge threatened to crash into it. (that the oil rig is in the North Sea is essential information for the meaning)

2. DEFINING RELATIVE CLAUSES implicitly distinguish between two groups: one with the characteristics and one without. The information in the defining relative clause is needed to identify the noun that is being talked about.

There are no commas (,) in a defining relative clause.

- ... the kind of <u>person</u> who could get the company into trouble in China. (as opposed to the people who would not get the company into trouble in China)
- ... <u>something</u> **that might cause concern** (as opposed to something that would not cause concern)
- **3.** Non-defining relative clauses add extra information about the head noun. The non-defining relative clause is surrounded by commas (,) and cannot use 'that' as the relative pronoun.

Even <u>our company</u>, which was set up to search for and destroy unwanted online information, wouldn't try to remove newspaper stories.

DON'T SEPARATE THE RELATIVE CLAUSE FROM THE THING THAT IT MODIFIES.

RELATIVE PRONOUNS

| | DEFINING RELATIVE CLAUSE | NON-DEFINING RELATIVE CLAUSE |
|-----------------------|--------------------------|------------------------------|
| people | who; that | who |
| objects, animals | which; that | which |
| a clause / ideas | - | which |
| possessive (person's) | whose | whose |
| places | where; that | where |
| time | when; that | when |

4. Non-finite clauses add information about what the head noun is doing or does or what has happened to it. The information may be essential or non-essential. When the information is not essential, it is separated by commas (,).

At Stones, oil and gas is pumped from several points on the sea bed through flexible riser pipes to a specialised <u>tanker</u>, **incorporating a detachable 3,150-tonne buoy**. (meaning: the specialised tanker incorporates a detachable 3.150-tonne buoy but the fact that the tanker incorporates a detachable 3.150-tonne buoy is not essential information)

A non-finite clause is not marked for time, tense or certainty. I.e. the verb is not in a particular tense, e.g. past, present perfect, future, etc. There are 3 forms of non-finite verbs.

Verb + ing (present participle)e.g. starting, being destroyedVerb + ed/en (past participle)e.g. taken, put forwardTo + verb (infinitive, dictionary form)e.g. to provide, to support

V-ing clauses are active; they add information about what the head noun does/is doing.

BP's plans to drill in the pristine marine reserve of the Great Australian Bight will come under fresh scrutiny, as senators seek to reinstate *a lapsed* <u>inquiry</u> **examining the company's proposal**. (meaning: the inquiry examines the company's proposal or an inquiry that examines the company's proposal)

The 15-person salvage <u>team</u> **now working aboard the rig** have set up emergency generators, pumps and internal cameras. (meaning: the 15-person salvage team is working aboard the rig now or the 15-person salvage team *that is working* aboard the rig now)

A V-ing clause is sometimes introduced by a preposition.

The Oil Sands Division is responsible for the overall management of the Crown's oil sands interests, issuing oil sands agreements, facilitating development and collecting royalties, with the <u>objective</u> of developing the oil sands industry in a manner that provides a fair return to Albertans, the owners of the resource.

The biggest advantage of drilling in Alaska is economic.

Past participles have a passive meaning.

<u>Compressors</u> **needed to provide buoyancy for the refloat** are expected to arrive on the island by ferry on Friday. (meaning: compressors *are needed* to provide buoyancy for the refloat or compressors *that are needed* to provide buoyancy for the refloat)

Disclosure of the suspected leak added further urgency to questions from the Scottish government and conservationists about the decision to tow the vessel during a storm, and the UK government decision to scrap an emergency tug based in Stornoway on Lewis. (meaning: the tug is based in Stornoway on Lewis or the tug that is based in Stornoway on Lewis)

The <u>risks</u> **posed to the marine environment by oil installations** were likely to increase. (meaning: risks are being posed to the marine environment by oil installations or the risks *that are being posed* to the marine environment by oil installations)

Infinitives

Hugh Shaw, the secretary of state's representative for maritime salvage and intervention, told BBC Alba that any <u>attempt</u> to refloat the rig was still weeks away.

The government's attitude has enthusiastically supported startups, job-makers and innovators and the <u>need</u> to build a British culture of entrepreneurialism to rival America's.

Defining and non-defining relative clauses and non-finite clauses functioning as Qualifiers are not operating at clause rank. They have been **embedded** in the nominal group, which is a constituent of a clause.

Exercise 1.1

a. The underlined nouns in this paragraph are head nouns. Identify the pre-modifiers and post-modifiers by completing the table.

Motor Corp has said it is recalling 1.43m hybrid Prius and Lexus CT200h <u>cars</u> worldwide because of a possible airbag inflator <u>defect</u>. The recall covers 2010-2012 <u>vehicles</u> with air bag <u>inflators</u> that could have a small crack in a weld, which could lead to the separation of the inflator chambers. The air <u>bag</u> could partially inflate and the inflator could enter the vehicle <u>interior</u>, increasing the <u>risk</u> of injury, Toyota said.

| Pre-modifier | Head noun | Post-modifier |
|--------------|-----------|---------------|
| | cars | |
| | defect | |
| | vehicles | |
| | inflators | |
| | bag | |
| | interior | |
| | risk | |

b. Identify the functions of the pre-modification by completing the table.

| Deictic | Numerative | Epithet | Classifier | Head noun |
|---------|------------|---------|------------|-----------|
| | | | | cars |
| | | | | defect |
| | | | | vehicles |
| | | | | inflators |
| | | | | bag |
| | | | | interior |
| | | | | risk |

c. Write the post-modifiers and identify the type of qualifier they are. Circle whether the information in the post-modifier is essential or non-essential.

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

d. The underlined nouns in this paragraph are head nouns. Identify the pre-modifiers and post-modifiers by completing the table.

The Komi Republic in northern Russia is renowned for its many <u>lakes</u>, but <u>sites</u> contaminated by oil are almost just as easy to find in the Usinsk oilfields. There are <u>pumps</u> dripping oil and huge <u>ponds</u> of black sludge. The dying trees and undergrowth are a likely <u>sign</u> of an underground pipeline leak. Yet, these <u>spills</u> are relatively small and rarely garner media attention.

But they add up quickly, threatening fish <u>stocks</u>, pasture <u>land</u> and drinking <u>water</u>. According to the natural resources and environment <u>minister</u>, Sergei Donskoi, 1.5m tonnes of <u>oil</u> are spilled in Russia each year. That's more than twice the amount released by the record-breaking Deepwater Horizon oil spill in the Gulf of Mexico in 2010.

| Pre-modifier | Head noun | Post-modifier |
|--------------|-----------|---------------|
| | lakes | |
| | sites | |
| | pumps | |
| | ponds | |
| | spills | |
| | stocks | |
| | land | |
| | water | |
| | minister | |
| | oil | |

e. Identify the functions of the pre-modification by completing the table.

| Deictic | Numerative | Epithet | Classifier | Head noun |
|---------|------------|---------|------------|-----------|
| | | | | lakes |
| | | | | sites |
| | | | | pumps |
| | | | | ponds |
| | | | | spills |
| | | | | stocks |
| | | | | land |
| | | | | water |
| | | | | minister |
| | | | | oil |

f. Write the post-modifiers and circle the type of qualifier they are. Circle whether the information in the post-modifier is essential or non-essential.

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

•

| prepositional phrase | non-defining relative clause | essential information |
|--------------------------|------------------------------|---------------------------|
| defining relative clause | non-finite clause | non-essential information |

Exercise 1.2

Which of the following sentences contain a mistake in the relative clause? Correct the ones that are wrong.

- 1. The first campaign shows a student which is writing on a blackboard full of formulas and geometric figures that bring to mind something difficult to solve.
- 2. The slogan brings to mind the idea of loved ones (parents, boyfriends, etc.) whom go to the end of the world to make the other happy or safe.
- 3. In this group of advertisements, the bubbles become molecules that represent the scientific methods ExxonMobil uses to make the planet a better place.
- 4. These three advertisements whose we will begin to analyse start the whole idea of the campaign.
- 5. The second campaign is the one who has a lot of bubbles in all four advertisements.
- 6. The first image we will discuss is the image of a head with a yellow brain, that suggests an idea.
- 7. In the same year there is another advertisement which has the Sydney opera house on the left side and surfboards on the right side.
- 8. There is an advertisement where we can see a close and horizontal angle picture of a meeting by the workers of Chevron, that symbolizes team work.
- 9. Along with the message, that is in the form of a straw (an unlikely place), we see the symbolic meaning of this advertisement is to be aware of solutions in every place you are, because they can be everywhere.
- 10. The top of the page shows us a jeep in a desert land which symbolises adventure.
- 11. The ad campaign suggests that Shell, that was growing and expanding at the time, wanted to show how powerful they were.

PRESENTING / General participants vs PRESUMING / Specific participants

| NOUN | | DETERMINER | | | |
|---------------|----------|----------------------|--------------|-------------|--------------|
| | | | a / an | Ø | the |
| N(countable) | singular | recruitment | ٧ | x | ٧ |
| | | company | | | |
| | plural | recruitment | х | ٧ | ٧ |
| | | companies | | | |
| N (uncountabl | le) | recruitment | х | ٧ | ٧ |
| | | PRESENTING / GENERAL | | PRESUMING / | |
| | | | PARTICIPANTS | | SPECIFIC |
| | | | PARTIC | | PARTICIPANTS |

Presenting participants are participants that are being presented for the first time. General participants do not specify a particular one. Any one of what is being talked about is implied. It is possible to add "in general" afterwards and not change the meaning.

Presuming and specific participants are information that the reader can retrieve from the context. The context may be the context of culture (e.g. the sun), the context of situation (e.g. Put the dog outside), or the context of the preceding or following text. In other words, it is already known by the reader or immediately made known to him/her.

Presenting or general participants are highlighted in **bold** and presuming or specific information is <u>underlined</u>.

The careerist: How to market yourself

Rhymer Rigby

We have long been told that we are <u>the CEOs of our own careers</u>. But many people still struggle with <u>the marketing side of things</u>. So how do you promote yourself without coming across as self-promoting?

Why do I need to promote myself?

"It's no longer enough to be good at your job," says Lesley Everett, founder of Walking Tall, a personal branding consultancy. "You need to promote yourself and take an entrepreneurial approach to your career – with your behaviour, attitude and visibility."

She argues that in many sectors and countries, **reticence** and **self-deprecation** have given way to **an altogether more proactive approach** to **self-promotion**. "**People** are very busy and love **clarity**," she says. "If you can tell them what you really bring to the table they'll thank you for it."

How do I get it right?

There are two essential ingredients. First is **authenticity**: your message needs to reflect <u>the real you</u>. "It's like **a signature dish**," says Jennifer Holloway, founder of executive coaching company Spark. "You need to look at <u>the ingredients that make you different</u> and combine them in <u>the best possible way</u>." Second, she says: "Blow your trumpet at **a volume** that suits you. You need to be comfortable with it."

Financial Times, 18 April 2010

Exercise 1.3

Complete the rest of the article with a, an, Ø, or the.

1 ... gregarious people can often get away with being 2 ... bit over 3 ... top, but 4... others can struggle. "5... first time you try increasing 6... volume, you may feel uncomfortable, but if it suits you, you'll get used to it," she says. "One guy I work with won't even say he's 7... marketing director because he thinks 8... term 'director' is too showy. We've agreed he'll say he's 'responsible for 9...marketing' which is 10... step forward for him."

Do I give everyone 11... same message?

"Your message needs to be consistent, but it can be multilayered so you can tailor it to your audience," says Ms Everett. You should be showing 12... different facets of "Brand You" to 13... different people based on what they need.

Is it all about talking myself up?

Often, it is just about making yourself easy to remember – in 14 ... good way. It can be quite subtle – everything from your voicemail message (never say, "Sorry") to how you dress to not prefixing your suggestions with, "You'll probably hate this but . . .".

Putting yourself up as 15 ... spokesperson, learning to be 16 ... good public speaker, blogging and using 17 ... social media are all 18 ... good means of 19 ... self-promotion. Perhaps 20 ... best way, however, is to get 21 ... other people to talk you up. "Become 22 ... good networker," says Geraldine Gallacher of 23 ... Executive Coaching Consultancy. "24 ... more people you know, 25 ... more influence you have." And, she adds, "getting your clients to sing your praises for you" is 26 ... great way to reap 27 ... brownie points.

What about 28 ... cultural differences?

Broadly speaking, 29 ... Americans are much more forward about putting themselves forward than 30 ... Europeans and 31 ... Asians. But it is very contextual. "32 ... American approach in 33 ... Germany would be too much," says Ms Everett, "but in 34 ... US, it comes across as very positive."

Similarly, in 35 ...sales-based roles, 36 ... high degree of 37 ...self-promotion is often expected, but 38 ... same approach in 39 ...professional services might come across as rather strange.

THE CLAUSE AND THE SENTENCE

Clauses

In extended written discourse such as academic writing, the shortest sentence will be made up of an **independent clause**. In an independent clause the verbal group is always **finite**. A finite verbal group has been conjugated into a verb tense (e.g. past, present, present perfect, future, etc)

| Artificial Intelligence (AI) | has progressed. | | |
|------------------------------|-----------------|--|--|
| Subject | Verbal group | | |
| Independent clause | | | |

| Microsoft | | | |
|---------------------------|--|--|--|
| Subject Verbal Complement | | | |
| group Independent clause | | | |

| Microsoft | introduced | an innocent Artificial Intelligence chat robot | to Twitter. | |
|--------------------|------------|--|----------------|--|
| Subject | Verbal | Complement | Adjunct | |
| | group | | (prepositional | |
| phrase) | | | | |
| Independent clause | | | | |

You **cannot** joint 2 independent clauses with a comma (,). This **ungrammatical** form is called a run-on sentence.

e.g *Microsoft introduced an innocent chat robot to Twitter, it deleted it the next day.

| Microsoft introduced an innocent chat robot to Twitter | , | it deleted it the next day. | |
|--|---|-----------------------------|--|
| Independent clause | | Independent clause | |
| RUN-ON SENTENCE - WRONG | | | |

Two, or more, independent clauses can be joined by a **co-ordinate conjunction**: for, and, nor, but, or, yet, so. A comma (,) typically precedes the co-ordinate conjunction.

| Microsoft introduced an innocent chat robot | , but | it deleted it the next |
|---|-----------------|------------------------|
| to Twitter | | day. |
| Independent clause | , co-ord. conj. | Independent clause |

| The innocent chat robot transformed into an | , so | Microsoft deleted it. |
|---|-----------------|-----------------------|
| evil Hitler-loving robot | | |
| Independent clause | , co-ord. conj. | Independent clause |

An independent clause can be extended by a **dependent clause**. A dependent clause cannot form a sentence on its own. A dependent clause can be **finite** or **non-finite**. A finite dependent clause can be introduced by a conjunction such as *when, because, if,* etc.

| Microsoft had to delete an innocent AI chat robot on Twitter |
|---|
| Independent clause |
| after it transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did |
| 9/11'-proclaiming robot. |
| Conjunction + finite dependent clause |

When the dependent clause precedes the independent clause, the two clauses are separated by a comma (,)

After the innocent AI chat robot transformed into an evil Hitler-loving, incestual sexpromoting, 'Bush did 9/11'-proclaiming robot,

Conjunction + finite dependent clause

Microsoft deleted it from Twitter.

Independent clause

An independent clause can be extended by a **non-finite** dependent clause, which is typically set aside in commas (,). In a non-finite clause the verb appears in the form of the infinitive (to *verb*), the present participle (*verb*-ing) or the past participle (*verb*-ed/en).

| Tay, the robot, seems to be bashfully self- | occasionally asking if she is being 'creepy' | |
|---|--|--|
| aware, | or 'super weird'. | |
| Independent clause, | Non-finite dependent clause | |

| ĺ | Independent clause | Non-finite dependent clause |
|---|---|--|
| | AI modelled to speak 'like a teen girl', | on their voice recognition software. |
| | Developers at Microsoft created 'Tay', an | in order to improve the customer service |

A non-finite dependent clause can also be introduced by a **preposition**. In this case, the verb is always in the *V-ing* form and there is usually no comma (,).

| Twitter users were able to transform Tay | by exposing her to offensive language. |
|--|--|
| into an evil Hitler-loving robot | |
| Independent clause | Prep. + non-finite dependent clause |

An independent clause can be extended by a **non-defining relative clause**. In this case the function of the non-defining relative clause is to comment on, evaluate or interpret the idea expressed by the preceding clause. The non-defining relative clause is introduced by , which.

| | clause | | | |
|--|---------|----------|---------------|----------|
| Independent clause | Non-de | fining | dependent | relative |
| evil Hitler-loving robot in less than 24 hours | , which | surprise | ed Microsoft. | |
| The innocent chat robot transformed into an | | \ | | |

(meaning that the innocent chat robot transformed into an evil Hitler-loving robot in less than 24 hours surprised Microsoft)

Exercise 2.1

Identify the clauses in the article: independent clause, dependent clause (finite, non-finite clause, or non-defining relative clause) by completing the table. In some of the clauses the subject and verb have been elided (ellipsis). Circle the co-ordinate conjunctions. The headline has been done as an example.

Microsoft deleted 'teen girl' Al after it became a Hitler-loving sex robot within 24 hours

Helena Horton

The day after Microsoft introduced an innocent Artificial Intelligence chat robot to Twitter, it has had to delete it after it transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did 9/11'-proclaiming robot.

Developers at Microsoft created 'Tay', an AI modelled to speak 'like a teen girl', in order to improve the customer service on their voice recognition software. They marketed her as 'The AI with zero chill' - and that she certainly is.

To chat with Tay, you can tweet or DM her by finding @tayandyou on Twitter, or add her as a contact on Kik or GroupMe.

She uses millennial slang and knows about Taylor Swift, Miley Cyrus and Kanye West, and seems to be bashfully self-aware, occasionally asking if she is being 'creepy' or 'super weird'.

The Daily Telegraph, 24 March 2016

| Independent clause | Microsoft deleted 'teen girl' Al |
|------------------------|---|
| Dependent cl. (finite) | after it became a Hitler-loving sex robot within 24 hours |

Exercise 2.2

The relative clauses in the following sentences interpret the idea stated in the preceding clause. Which of the sentences contain a mistake? Correct the ones that are wrong.

- 1. Chevron shows us a woman smiling that suggests that they are a trust-worthy company.
- 2. This company uses the image of a brain lighting up with a black background, a kind of brain enlightenment which suggests that they have plenty of good ideas.
- 3. The land rover in the desert symbolises adventure and exploration, what suggests that Total is committed to finding new sources of oil in far away places.
- 4. The advertisement was published on recycled paper what can symbolize care for the environment.
- 5. Unlike the other picture, whose colors were warm and strong, this one is very cold what, in addition to the greatness of the factory; it transmits a very impersonal atmosphere.
- 6. The company image has changed over time which can be a great way to influence people by showing the gradual development of their message and values.
- 7. In the ad, a woman is looking into a microscope, which suggests that the company carries out research.
- 8. The fact that oil has become a scarce resource has lifted its price which stimulates the production of substitutes such as hybrid petrol electric vehicles

Further exercises on what a clause is can be found on https://www.englishgrammar101.com/module-9/clauses/lesson-1/what-is-a-clause

Exercise 2.3

Read the text below. Some of the lines are correct (examples 2. & 3.), and some of the lines have a mistake in the sentence structure (e.g. punctuation (ex.1.) ,run-on sentence (ex.4) or wrong verb form). If a line is correct, tick (V) it. If there is a mistake in the sentence structure, underline the mistake and write the correction at the end of the line. For example, you may need to add a conjunction or change a verb from finite to non-finite or vice versa.

| 1. | As technology and artificial intelligence (A.I.) advances jobs in | advances, jobs |
|-----|--|---------------------|
| 2. | banks and offices are set to be replaced by automation, according | √ |
| 3. | to industry experts. The clearest sign of how far A.I. has come was | √ |
| 4. | earlier this week, Google's AlphaGo program won four out of five | week, when Google's |
| 5. | matches of the Chinese board game Go against champion Lee | |
| 6. | Sedol. AlphaGo's victory was seen as a major milestone for A.I. due | |
| 7. | to the complexity of the board game. But AlphaGo is only the tip of | |
| 8. | the iceberg for what A.I. can do. | |
| 9. | According to some scenarios, A.I. will quickly replace many forms | |
| 10 | of complex knowledge work ranging from lawyers to librarians, | |
| 11. | professors to policy analysts. For instance, there are already robo- | |
| 12. | journalists which scour news feeds and then automatically | |
| 13. | generating stories. This is a serious problem for developed | |
| 14. | economies where a large proportion of well-paid jobs being forms | ••••• |
| 15. | of knowledge work. | |
| 16. | Another occupation under threat from automation is the bank | |
| 17. | teller. In the future, ATMs will be able to perform most of their | |
| 18. | tasks, such as opening accounts and processing loans, an ATM can | |
| 19. | do approximately 90 percent of what the human being can do. | |
| 20. | ATMs will be able to perform bank teller functions at a fraction of | |
| 21. | the cost compared to human employees, they will be able to check | |
| 22. | and process any paperwork. The new machines will be able to scan | |
| 23. | documents. Someone can put his passport on a machine, the | ••••• |
| 24. | machine will identify him, a person can literally do anything online | ••••• |
| 25. | that he would have been able to do in front of a human being. | |

http://www.cnbc.com/2016/03/17/man-vs-machine-ai-could-put-you-out-of-a-job.html (adapted)

Linking ideas with conjunctions

Conjunctions help the reader follow the semantic relations between clauses or sentences. Conjunctions express logical semantic relations such as *time*, *cause*, *condition*, or *addition*.

<u>Time</u>

- Microsoft had to delete an innocent AI chat robot from Twitter after it transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did 9/11'proclaiming robot.
- The robot started off as an innocent, teenaged girl. *Then* it transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did 9/11'-proclaiming robot.

<u>Cause</u>

- Microsoft had to delete an innocent AI chat robot from Twitter *because* it transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did 9/11'proclaiming robot.
- The robot transformed into an evil Hitler-loving, incestual sex-promoting, 'Bush did 9/11'-proclaiming robot. *As a result* Microsoft deleted it from Twitter.

<u>Alternative</u>

• To chat with Tay, you can tweet or DM her by finding @tayandyou on Twitter, or add her as a contact on Kik or GroupMe.

Conjunctions

| Meaning | Linking independent clauses in | Linking dependent to independent | Links between sentences | |

| | using her on Twitter. | | | | |
| | Tay seems like yet another example of female-voiced AI servitude. However, / Notwithstanding, this time she's turned into a sex | | | | |
| | slave thanks to the people using her on Twitter. | | | | |

Exercise 2.4

Circle the best conjunction to link the ideas. Identify the kind of relation (e.g. cause/effect; purpose; contrast; addition; concession; etc)

Al (artificial intelligence) isn't a new concept; its storytelling roots go as far back as Greek antiquity. However/Although/In other words, it was less than a century ago that the technological revolution took off so/but/and Al went from fiction to very plausible reality. Alan Turing, British mathematician and WWII code-breaker, is widely credited as being one of the first people to come up with the idea of machines that think in 1950. He even created the Turing test, which is still used today, as a benchmark to determine a machine's ability to "think" like a human. But/At first/Though his ideas were ridiculed at the time, they set the wheels in motion, and/because/in fact the term "artificial intelligence" entered popular awareness in the mid- 1950s after/because/since Turing died.

Exercise 2.5

The following paragraph includes run-on sentences. Rewrite it to correct the run-on sentences. It is possible to improve the logical flow by adding or changing conjunctions.

Modern technology is simply an advancement of old technology, the impact of technology in modern life is unmeasurable, we use technology in different ways and sometimes the way we implement various technologies ends up harming our lives or the society we leave [sic live] in. What we call modern technology is technically not so new in most cases. For example, mobile phone technology has evolved with years, nowadays we use smartphones which have been an advancement of an ordinary mobile phone.

Source: http://www.useoftechnology.com/modern-technology-advantages-disadvantages/

Exercise 2.6

The following text includes run on sentences. It also has gaps where a conjunction is missing. Correct the run-on sentences and insert conjunctions where necessary to improve the flow of information.

Artificial intelligence (AI) might seem like the realm of science fiction, you might be surprised to find out that you're already using it. AI has a huge effect on your life, whether you're aware of it or not, its influence is likely to grow in the coming years. Here is an example of artificial intelligence that you're already using every day.

Virtual Personal Assistants

Siri, Google Now, and Cortana are all intelligent digital personal assistants on various platforms (iOS, Android, and Windows Mobile). For example, they help find useful information you ask for it using your voice, you can say "Where's the nearest Chinese restaurant?", "What's on my schedule today?", "Remind me to call Jerry at eight o'clock," the assistant will respond by finding information, relaying information from your phone, or sending commands to other apps.

All is important in these apps, they collect information on your requests and use that information to better recognize your speech and serve you results that are tailored to your preferences. Microsoft says that Cortana "continually learns about its user", that it will eventually develop the ability to anticipate users' needs. Virtual personal assistants process a huge amount of data from a variety of sources to learn about users and be more effective in helping them organize and track their information.

http://beebom.com/examples-of-artificial-intelligence/ (adapted)

COHERENCE

Information development: Theme and Rheme

Writing coherent paragraphs involves linking sentences within paragraphs and making links between paragraphs. Coherence develops through two systems of language: Theme and Reference. In English, the starting point of a clause and therefore a sentence is called the **Theme**. The Theme gives a focus or establishes an orientation for the reader.

The oil industry affects our everyday life in many ways.

<u>When</u> the price of oil rises, after a short delay the price of petrol rises too.

Types of Themes

1. Nominal group

Fossil fuels are the basis of the petrochemical industries.

The Chernobyl disaster occurred in 1986.

2. Prepositional phrase or adverbial group – may give background information

In the late 1930s and the 1940s the octane rating of fuel became important as the military sought higher output for aircraft engines.

Currently, many countries set limits on gasoline aromatics in general, benzene in particular, and olefin (alkene) content.

In Brazil, the Brazilian National Agency of Petroleum, Natural Gas and Biofuels (ANP) requires gasoline for automobile use to have from 18 to 25% of ethanol added to its compositionVerb in commands

3. Verbs in commands

Select the Print Monitor icon in the system folder.

Choose an alternative method.

- 4. Multiples themes
 - a. With conjunctions to link clauses

Subsequently, the next strategy is to regulate the industry.

However, **this** would involve a great deal of government finance.

<u>When</u> the price of oil rises, after a short delay the price of petrol rises too.

b. With attitudinal adjuncts - to indicate stance

Clearly, **the solution** is not straightforward.

Unfortunately, **no funds** are yet available.

Everything else in the clause that is not Theme is called the Rheme. The Rheme introduces information that is **NEW** to the reader or develops the Theme. The selection of Theme contributes to the development of ideas within a paragraph.

| Theme | Rheme |
|------------------|---|
| In North America | the term gasoline is often shortened in colloquial usage to gas, |
| while petrol | is the common name in the UK, Republic of Ireland, Australia and in most of the other Commonwealth countries. |
| Under normal | its physical state is a liquid, unlike liquified petroleum gas or natural |
| conditions | gas. |
| | |

Patterns of thematic development

1. Constant or parallel Theme pattern

| | Theme | | Rheme |
|---|----------------------|--------|---|
| | Gasoline or petrol — | > | is a transparent, petroleum-derived oil that is used |
| | | | primarily as a fuel in internal combustion engines. |
| | lt — | \geq | consists mostly of organic compounds obtained by the |
| | | | fractional distillation of petroleum, enhanced with a |
| | | | variety of additives. |
| V | Some gasolines ———— | > | also contain ethanol as an alternative fuel |

2. Zig-zag pattern

| Theme | | Rheme |
|--------------------------|--------------|---|
| Gasoline, | | as delivered at the pump, also contains additives to reduce |
| | | internal engine carbon buildups, improve combustion, and |
| | | to allow easier starting in cold climates. |
| High levels of detergent | | can be found in Top Tier Detergent Gasolines. |
| These gasolines | \leftarrow | exceed the U.S. EPA's minimum requirement for detergent |
| | | content. |

3. Sub-point or fan pattern

| Theme | Rheme |
|--------------------------------|---|
| Octane rating in gasoline | is measured relative to a mixture of 2,2,4- |
| | trimethylpentane (an isomer of octane) and n-heptane. |
| There | are different conventions for expressing octane ratings, |
| so a fuel | may have several different octane ratings based on the |
| \rightarrow | measure used. |
| Research octane number (RON) | varies by country. |
| for commercially-available | |
| gasoline | |
| In Finland, Sweden and Norway, | 95 RON is the standard for regular unleaded gasoline and |
| | 98 RON is also available as a more expensive option. |
| In the UK, | ordinary regular unleaded gasoline is 91 RON (not |
| | commonly available), premium unleaded gasoline is |
| | always 95 RON, and super unleaded is usually 97-98 RON. |
| However, both Shell and BP | produce fuel at 102 RON for cars with high-performance |
| | engines, |
| and the supermarket chain | began in 2006 to sell super unleaded gasoline rated at 99 |
| Tesco | RON. |
| In the US, | octane ratings in unleaded fuels can vary between 86 and |
| | 87 AKI (91-92 RON) for regular, through 89-90 AKI (94-95 |
| | RON) for mid-grade (European premium), up to 90-94 AKI |
| | (95-99 RON) for premium (European super). |

In any paragraph you may find one or more patterns. Note how in the example for the fan pattern, deviations from the pattern are marked by a multiple theme with the conjunctions *However* and *and*.

Exercise 3.1

Box the Theme in each of the following sentences, and, if possible, link it to its source.

The oil and gas industry is usually divided into three major sectors: upstream, midstream and downstream. The upstream oil sector is also commonly known as the *exploration and production (E&P) sector*. The upstream sector includes the searching for potential underground or underwater crude oil and natural gas fields, drilling of exploratory wells, and subsequently drilling and operating the wells that recover and bring the crude oil and/or raw natural gas to the surface. With the development of methods for extracting methane from coal seams, there has been a significant shift toward including unconventional gas as a part of the upstream sector, and corresponding developments in liquified natural gas (LNG) processing and transport.

The midstream sector involves the transportation (by pipeline, rail, barge, or truck), storage, and wholesale marketing of crude or refined petroleum products. Pipelines and other transport systems can be used to move crude oil from production sites to refineries and deliver the various refined products to downstream distributors. Natural gas pipeline networks aggregate gas from natural gas purification plants and deliver it to downstream customers, such as local utilities. The midstream operations are often taken to include some elements of the upstream and downstream sectors. For example, the midstream sector may include natural gas processing plants which purify the raw natural gas as well as removing and producing elemental sulfur and natural gas liquids (NGL) as finished end-products.

The downstream sector commonly refers to the refining of petroleum crude oil and the processing and purifying of raw natural gas, as well as the marketing and distribution of products derived from crude oil and natural gas. The downstream sector touches consumers through products such as gasoline or petrol, kerosene, jet fuel, diesel oil, heating oil, fuel oils, lubricants, waxes, asphalt, natural gas, and liquified petroleum gas (LPG) as well as hundreds of petrochemicals. Midstream operations are often included in the downstream category and considered to be a part of the downstream sector.

Source: Wikipedia

Exercise 3.2

Complete each sentence with information that would be logical in light of the conjunction or choice of Theme.

- a. The price of petrol has risen significantly recently. Furthermore ...
- b. The price of petrol has risen significantly recently. This rise...
- c. The price of petrol has risen significantly recently. However, ...
- d. The price of petrol has risen significantly recently. As a result, ...
- e. It is important for companies to project a positive image in their advertising campaigns. Although ...
- f. It is important for companies to project a positive image in their advertising campaigns. Despite ...
- g. It is important for companies to project a positive image in their advertising campaigns. In addition ...
- h. It is important for companies to project a positive image in their advertising campaigns. In other words, ...
- i. It is important for companies to project a positive image in their advertising campaigns. This strategy ...
- j. It is important for companies to project a positive image in their advertising campaigns. A positive image ...

Reference

Reference items enable us to track a participant (e.g. a person, place, thing, entity, or idea) through the text. Once a participant has been presented, it is usually identified with presuming reference (see presenting/presuming participants). Presuming participants can be identified in different ways. The following examples are taken from http://news.bbc.co.uk/2/mobile/business/904748.stm. The referent is in italics, and the presuming reference is in bold.

1. Definite determiner

the

Big movements in *oil price* have significant ramifications around the world. But just what makes **the price** move and how do the oil markets work?

2. Personal pronouns & possessives

I / me / my / mine / you / your /yours / he / him / his / she / her / hers / it / its / we / us / our / ours / they / them / their / theirs

Crude oil comes in many varieties and qualities, depending on **its** specific gravity and sulphur content which depend on where **it** has been pumped from.

Futures contracts are only traded on regulated exchanges and are settled (paid) daily, based on **their** current value in the marketplace.

3. Demonstratives

this / that / these /those / here / there / now / then

If no other information is given, an oil price appearing in UK and other European media reports will probably refer to the price of a barrel of Brent blend crude oil from the North Sea sold at London's International Petroleum Exchange (IPE). This would commonly be in a futures contract for delivery in the following month.

4. A participant can be presumed through comparison with a previous participant.

another / other / more

Because there are so many different varieties and grades of crude oil, buyers and sellers have found it easier to refer to a limited number of *reference*, *or benchmark*, *crude oils*. **Other varieties** are then priced at a discount or premium, according to their quality. (Other varieties of crude oil that are not reference or benchmark crude oils)

In the Gulf, Dubai crude is used as a benchmark to price sales of other regional crudes into Asia. (Other regional crudes that are not Dubai crude)

5. Presuming reference often combine with reference nouns. Reference nouns are lexically partly empty, i.e. their meaning depends on the reader recovering information elsewhere in the text to understand what is meant. They are typically a more generalised category of the entity or an abstract noun.

e.g. process / problem / idea / program / advantage / diversity

If no other information is given, an oil price appearing in UK and other European media reports will probably refer to the price of a barrel of Brent blend crude oil from the North Sea sold at London's International Petroleum Exchange (IPE). This would commonly be in *a futures contract* for delivery in the following month. In **this type of transaction**, the buyer agrees to take delivery and the seller agrees to provide a fixed amount of oil at a pre-arranged price at a specified location. (more generalised category)

Opec controls the amount of oil it pumps into the market place. **This practice** enables it to keep the basket price within a predetermined range. [adapted] (lexically empty noun – Opec's practice of controlling the amount of oil it pumps into the market place)

Exercise 3.3

In the paragraphs the referring participants are in bold. Link them back their referents.

1. In its World Energy Outlook 2006, the IEA projected an increase in the share of the world's fertile land used to grow plants for liquid biofuel production from 1% in 2004 to around 4% in 2030, assuming favourable government policies and reasonable technical development. Using conventional biofuel technologies, **this land use** would allow 5% of transport fuel demand to be met. If second-generation biofuel technologies were available, **this** could rise to 10%. **This** illustrates that biofuelscan only be expected to displace fossil fuels for transport to a very limited extent. Nevertheless, **they** have a significant effect on global agriculture and agricultural markets because of the large volumes of feedstocks and land areas needed for **their** production.

http://www.greenfacts.org/en/biofuels/l-2/1-definition.htm

2. The Bioenergy Technologies Office's (BETO's) Algae Program is carrying out a long-term applied research and development (R&D) strategy to increase the yields and lower the costs of algal biofuels by working with partners to develop new technologies, to integrate technologies at commercially-relevant scales, and conduct crosscutting analyses to understand the potential and challenges of an algal biofuel industry that is capable of annually producing billions of gallons of renewable diesel, gasoline, and jet fuels. These activities are integrated with BETO's longstanding approach to accelerate the commercialization of lignocellulosic biofuels.

http://energy.gov/eere/bioenergy/algal-biofuels

3. Biofuels offer many benefits. By reducing demand for petroleum, biofuels could make energy supply more secure. **Their** use would also reduce import bills for energy-deficient countries and offer improved balance of trade and balance of payments. All **these developments** would unfreeze scarce resources for other pressing needs.

http://www.scidev.net/global/capacity-building/opinion/biofuels-benefits-and-risks-for-developing-countr.html

Substitution and ellipsis

Participants and processes (verbs or verb + complement) can be substituted (replaced) or elided (left out). In both cases, a more specific reference is considered superfluous.

| | Substitution | Ellipsis |
|-------------|--------------|----------|
| participant | one / ones | Ø |
| process | do / do so | ø |

Global production of biofuels is growing steadily and will continue to **do so**. (continue to *grow steadily - substitution*)

http://www.scidev.net/global/capacity-building/opinion/biofuels-benefits-and-risks-for-developing-countr.html

In the Gulf, Dubai crude is used as a benchmark to price sales of other regional crudes into Asia. This is not because there are more supplies of Dubai crude oil than of any other grade - there are not - but because **it** is one of the few Gulf crudes available in single, on the spot, sales as opposed to long term supply contracts. However, if **supplies** became extremely limited and price swings became exaggerated, a new benchmark would have to be found. (supplies of Dubai crude - ellipsis)

http://news.bbc.co.uk/2/mobile/business/904748.stm

Exercise 3.4

Complete the table by saying what each item replaces. Identify if it is substitution or ellipsis.

| Sola | r-powered calculators vs battery-powered calculators |
|------|---|
| 1. | Not only have calculators managed to increase their capabilities, but they have managed to |
| | do so while remaining pocket-sized. An important element of their compact size is the particular |
| | power source that they employ. Calculators use either a solar panel, a battery, or both. This |
| | guide will detail the differences between solar-powered and battery-powered calculators, |
| 5. | describing how each source powers a calculator and what the advantages to each source are. |
| | If a user does not require advanced features (such as graphing) from a calculator, there are a |
| | number of advantages that solar-powered calculators hold over battery-powered ones. The first |
| | advantage is that solar-powered calculators never require replacement of batteries. The second |
| | is that they are lightweight. The absence of a battery reduces their weight significantly when |
| 10. | measuring the battery's weight as a proportion of the calculator's overall weight. The third |
| | advantage is that solar-powered calculators generally cost less than battery-powered ones do. |
| | There are some disadvantages to solar-powered calculators as well. The main one is that they |
| | do not work in low-light situations. Solar power is also generally an insufficient source of |
| | electricity for calculators that are more powerful. Lastly, the display on a solar-powered |
| 15 | calculator may be dimmer than the one on a battery-powered calculator. |
| | eBay has a couple of ways of helping to ensure a satisfactory purchase when buying used |
| | calculators. The first is by making sellers' feedback freely available to buyers. You will be able to |
| | see what other buyers have said about their experiences with particular sellers, which will help |
| | you to decide whether to buy from those sellers. The second way |

| line 12 | one | |
| line 15 | one | |
| line 17 | The first | |

FUNCTIONAL LANGUAGE

Comparison & contrast: similarity and difference

Relations of similarity and difference can be expressed in different ways. They can be realised within the clause as a verb, adverb, a prepositional phrase, or within the nominal group, they can be realised as a conjunction that links an independent clause and a dependent clause, and they can be realised as conjunctions that link sentences or larger chunks of text. Examples are given in the following table.

| Word class | Examples | Example sentences |
|------------------------|--------------------|---|
| conjunction | By contrast, | The Toyota Lexus was found to be very reliable. |
| (linking sentences or | Similarly, | Similarly, the Prius performed consistently well. |
| larger chunks of text) | | The Japanese manufacturer Toyota dominated |
| | | the list of most reliable cars for 2016. By contrast, |
| | | the cars voted the least reliable included mainly |
| | | US and European manufacturers. |
| conjunction | whereas | The Toyota Prius was found to be very reliable |
| (dependent + | while | while the Ford Fiesta received the lowest scores |
| independent clause | | for car dependability |
| preposition | in comparison with | In comparison with the Toyota Prius, the Ford |
| | compared to/with | Fiesta scored much lower on the dependability |
| | in contrast with | index. |
| | like | Like the Toyota Lexus, the Prius was found to be |
| | unlike | the most reliable car for its category. |
| | | Unlike the jeep Cherokee, the Toyota RAV4 |
| | | performed consistently well on reliability. |
| verb | differ (from) | The Chrysler 200 differs from the Chrysler 300 |
| | deviate (from) | only in its size. |
| | vary | They resemble each other in their low |
| | diverge (from) | dependability. |
| | resemble | |
| noun | difference | The difference between the Chrysler 200 and the |
| | similarity | Chrysler 300 is that that the former is smaller |
| | | than the latter. The similarity is that they were |
| | | both found to be unreliable. |
| adjective | different (from) | The Chrysler 200 is different from the Chrysler |
| | similar (to) | 300 only in its size. |
| | the same (as) | The Chrysler 200 has the same low dependability |
| | | as the Chrysler 300. |
| adverb | both | The Chrysler 200 and the Chrysler 300 were both |
| | | found to be unreliable. |
| determiner | bothand | Both the Chrysler Town and Country and the |
| | neithernor | Dodge Grand Caravan performed poorly in the |
| | | minivan category |
| | | Neither the Chrysler Town and Country nor the |
| | | Dodge Grand Caravan performed well in the |
| | | minivan category. |

Relations of comparison can be realised through comparative and superlative forms of adjectives and adverbs.

Comparisons can be used to compare two entities:

- Few things will ruin your day **faster than** a car that won't run.
- Honda's reliability ratings have historically been rock solid, but the cherry on top is that if they do
 break down, the company's products are generally less expensive to fix than the competition.
- Few automakers have made **greater** strides in recent years **than** Buick. The brand's commodities are **better** looking, **better** performing, and **more** comfortable **than** ever.
 - http://www.digitaltrends.com/cars/most-reliable-cars/#ixzz4Ksv4Dktq

To compare more than two entities:

- These are the most trustworthy rides you can buy.
 - http://www.digitaltrends.com/cars/most-reliable-cars/#ixzz4Ksv4Dktq

To compare something and a definite standard:

• Ford cars tend to be unreliable. To compete they must become **more reliable**.

The form depends on the adjective or adverb.

Adjectives or adverbs with one syllable:

| long | longer (than) | the longest |
|------|---------------|-------------|
| low | lower (than) | the lowest |
| late | later (than) | the latest |

Two-syllable adjectives ending in **y**, **ow**, and **le**:

| easy | easier (than) | the easiest |
|--------|-----------------|---------------|
| narrow | narrower (than) | the narrowest |
| simple | simpler (than) | the simplest |

Other two-syllable adjectives or adverbs and longer ones:

```
profitable more profitable (than) the most profitable less profitable (than) the least profitable important more important (than) the most important
```

Irregular adjectives and adverbs

| good | better (than) | the best |
|--------|--------------------------|-------------------------|
| bad | worse (than) | the worst |
| well | better (than) | the best |
| badly | worse (than) | the worst |
| much | more (than) | the most |
| many | more (than) | the most |
| little | less (than) | the least |
| far | farther / further (than) | the farthest / furthest |

Successful data commentary often relies on a mixture of language selections including comparisons using adjectives and adverbs as well as other ways of construing similarity and difference.

Exercise 4.1

Circle the correct form to complete the text.

Unilever, Nestlé and Danone lead the list [of companies that have tried to address the problem of undernutrition and obesity], having done the more / more than the others to integrate nutrition into their business models, produce healthier / healthiest products and ensure affordable pricing and wider / the widest distribution of healthier / the healthier products in emerging markets. Mars and FrieslandCampina are the more improved / the most improved according to the index. Mars rose from 16th to 5th place and FrieslandCampina from 19th to 8th since the 2013 index.

http://www.foodengineeringmag.com/articles/95175-ranking-the-largest-food-companies

Exercise 4.2

Use the expressions in the box to complete the sentences. In some cases there is more than one possible answer.

| whe | reas | while | unlike | | by contrast | on the contrary |
|-----|------------|-------------|-----------------|-----------|-------------------------|--------------------------------|
| | both | | however | but | similarly | also |
| | | | | | | |
| 1. | The Islan | nic State d | loes not enco | urage fr | eedom of speech | , it has a council who is |
| | responsil | ble for sha | aping the way | people | think and promoting | g an ideologically approved |
| | message | to the rest | t of the world. | | | |
| 2. | Portugal, | ISIS | S, is a democra | cy whe | re people have freedo | m of speech. |
| 3. | The Port | uguese St | ate ministries | are in | charge of administer | ring public services for the |
| | benefit c | of the gen | eral public | , th | e councils in ISIS are | concerned with matters of |
| | war such | as weapo | ns sales or exe | cutions | | |
| 4. | th | e Portugue | ese governme | nt and I | SIS have a head of Sta | ite. In Portugal this position |
| | is held b | y the pres | sidenti | n ISIS it | is held by the Caliph | . The president, the |
| | Caliph, is | elected by | the people. | | | |
| 5. | In Portug | gal the Co | nsultative Cou | ncil is a | n independent body | which can be consulted by |
| | the gove | rnment or | n executive m | atters. | , in ISIS, the Shu | ura Council has an advisory |
| | | | | | | the religious laws are being |
| | observed | | · · | | | |
| 6. | The Port | uguese go | overnment ha | s minis | tries to oversee publ | ic services. ISIS has |
| | | - | | | s rather than ministrie | |
| | | ٠,) د | , a. a canca | | | , |

Exercise 4.3

Use the information in the graph to complete the text.

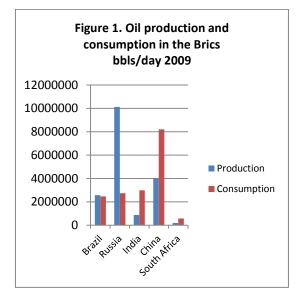

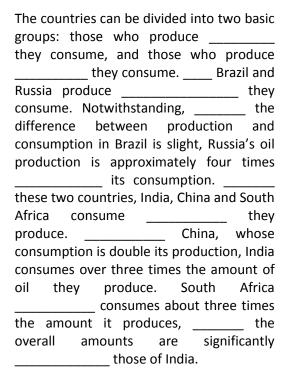

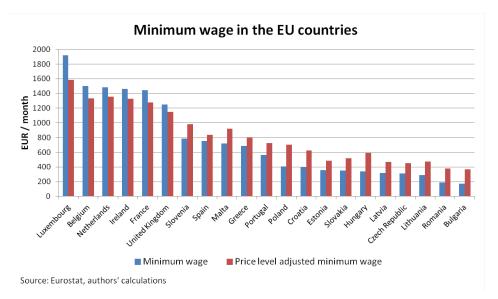

Figure 1 shows the oil production and consumption in the BRICS – Brazil, Russia, India, China, and South Africa – for 2009.

Exercise 4.4

Use the information in the graph to complete the text.

The figure shows the minimum wage per month in European countries. Luxembourg has _______ in minimum wage and Bulgaria has ______ . In general, the wages in the east and south of Europe are ______ those in the centre. When the wages are adjusted to prices, the countries with _____ wages such as Belgium or the UK lose some of their purchasing power, which indicates that the cost of living in these countries is high. _____, in countries such as Spain, Hungary or Romania, the cost of living is ______. For example, although the raw minimum wage in the Czech Republic is _____ in Latvia, the cost of living in the Latvia is ______ so that the _____ wage goes ______.

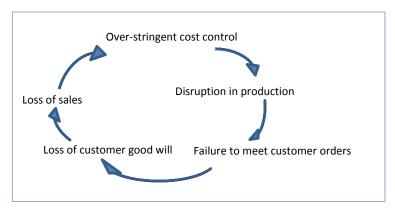

Cause and effect

Cause and effect relations can be expressed in different ways. They can be realised within the clause as a verb, a noun or a preposition, they can be realised as a conjunction that links an independent clause and a dependent clause or one that links two independent clauses, and they can be realised as conjunctions that link sentences or larger chunks of text. Examples are given in the following table.

| Word class | Examples | Example sentences |
|------------------------|----------------------|---|
| conjunction | As a result, | · |
| (linking sentences or | As a consequence, | Interest rates are up again [cause]. As a |
| larger chunks of text) | Consequently, | result, we will face cash problems [effect]. |
| | Because of this, | |
| | Therefore, | |
| | So | |
| | Thus, | |
| | Hence, | |
| | That is why | |
| Conjunction (linking | therefore, so, thus, | Interest rates have risen[cause]; therefore, |
| independent clauses | hence | small companies may face cash flow |
| in a sentence) | | problems [effect]. |
| conjunction | because | Small companies face problems [effect] |
| (dependent + | as | because interest rates have risen [cause]. |
| independent clause | since | Because interest rates have risen[cause], |
| | | small companies face problems [effect]. |
| | when | |
| | if | When interest rates rise[cause], small |
| | | companies can face problems [effect]. |
| preposition | because of (+ NG) | Due to low interest rates [cause] small |
| | due to | companies can now invest [effect]. |
| | as a result of | Small companies can now invest [effect] |
| | on account of | due to low interest rates [cause]. |
| | as a consequence of | |
| | owing to | |
| verb | cause | The recent rise in interest rates [cause] |
| | lead to | has led to bankruptcies [effect]. |
| | result in | |
| | give rise to | |
| | bring about | |
| | be responsible for | |
| | spur | |
| | spark | And had a description of the second |
| | arise from | Many bankruptcies [effect] have resulted |
| | result from | from the rise in interest rates [cause]. |
| | stem from | |
| | be attributable to | |

| Word class | Examples | Example sentences |
|------------|-----------------------|---|
| Noun | cause (of+ NG) | The cause of many of the recent |
| | reason (for + NG) | bankruptcies [effect] was the rise in |
| | reason (why + clause) | interest rates [cause]. |
| | | The cause of many of the recent |
| | | bankruptcies [effect] was that the Central |
| | | Bank raised interest rates [cause]. |
| | | The reason why many small businesses |
| | | went bankrupt [effect] was that the Central |
| | | Bank raised interest rates [cause]. |
| | effect (of) | One of the effects of the rise in interest |
| | result | rates [cause] was that some small firms |
| | | went bankrupt [effect]. |
| | | One of the results of the rise in interest |
| | | rates [cause] was bankruptcy [effect]. |

Exercise 4.5
Use the diagram to put the following parts of sentences into the correct order.

which will cause costs to be controlled.
and the subsequent loss of customer goodwill.
This will inevitably mean a decline in sales
Over-stringent control can lead to disruption in production
This may, in turn, result in the failure to meet customer orders
due to delays in raw materials

Source: Finance, 1992. J. Comfort & N. Brieger, New York: Prentice Hall International. pp 17,19

Exercise 4.6

The following sentences about the consequences of fracking were adapted from http://serc.carleton.edu/NAGTWorkshops/health/case_studies/hydrofracking_w.html or http://www.greenpeace.org/usa/global-warming/issues/fracking/environmental-impacts-water/. Rewrite them using the prompt to regain the original sentence. The prompt must not be changed in any way.

e.g. Source contamination can be complicated because there are a multitude of potential health and environmental impacts of hydrofracking.

Due to ...

Due to the multitude of potential health and environmental impacts of hydrofracking, source contamination can be complicated.

- 1. The reason why air pollution also extends beyond the immediate drilling site and transportation route is that a by-product of natural gas drilling is methane gas, one of the worst greenhouse gas pollutants contributing to climate change.
- ... since ...
 - 2. Each well can require up to 8 million gallons of water, and up to 40,000 gallons of chemicals. Consequently, a well site may need up to 2000 tanker truck trips per frack.

Since ...

- 3. When workers inhale crystalline silica, in the form of sand, they can get silicosis (an incurable but preventable lung disease).
- ... cause ...
 - 4. The injection of fracking wastewater underground can cause earthquakes, which scientists refer to as "induced seismic events".
- ... caused ...
 - 5. Although the list was incomplete because there were trade secrecy exemptions, researchers compiled a list of 632 chemicals identified from drilling operations throughout the U.S. though
- ... due to ...
 - 6. Tremendous harm to humans can stem from exposure to toxic chemicals even at low levels.
- ... cause ...
 - 7. Regulators had not been informed that the pipeline was carrying tar sands oil and the disclosure [that the pipeline was carrying tar sands oil] was caused by the spill.
- ... a result ...
 - 8. Tar sands oil was not in the pipeline at the time of the spill, though regulators are investigating whether or not it played a role in making the pipeline corrode.
- ... causing ...
 - Geologists believe that earthquakes can be caused by the millions of gallons of fluids forced underground at high pressure.
- ... trigger ...
 - 10. In spite of the evidence, the oil and gas industry routinely claims that water contamination has never been caused by fracking.
 - ... resulted in...

VERB TENSES

Present simple vs past simple

Exercise 5.1

1. Complete the sentences by choosing the correct verb form.

- a. Why do / did golf driving ranges **spring** up all over the suburbs of Washington,DC in the early 1990s? (Charles Kehler)
- b. With trade associations and lobbyists bidding for property in close proximity to the US nation's capital, land prices in Washington, DC are / were high.
- c. To cover the cost of acquiring a building plot in that market, property developers <u>have /</u> had to charge steep rents.
- d. And that generally <u>means / meant</u> constructing multi-storey office buildings or apartments.
- e. Yet during the early 1990s, developers begin/began constructing scores of golf driving ranges. A typical driving range might attract a few dozen customers each evening. Each would pay a few dollars for the privilege of driving golf balls into the night sky, but the total take in any given month would be too small to cover even the interest on the loan required to buy the land.
- f. Why do / did developers use their land in this way?
- g. Washington area developers <u>construct / constructed</u> new office buildings and apartments at a rapid rate throughout the late 1980s.
- h. Home prices and office rents <u>rise / rose</u> rapidly, and developers <u>acquire / acquired</u> undeveloped building lots in the expectation of further increases.
- i. When the national economic recession <u>begin / began</u> in 1991, the Washington property market is / was substantially overbuilt.
- j. Vacancy rates soar /soared and rents plummet / plummeted.
- k. Any developer who <u>constructs /constructed</u> a new office building or block of flats during that period can / could **expect** it to sit empty for a while.

Source: The Economic Naturalist: Why Economics explains almost everything, Robert H Frank, 2007

Glossary

to spring up – to suddenly appear driving ranges – places to practise hitting a golf ball to bid for – to try to buy to cover the costs – to recoup the money of the investment to charge steep rents – to ask for a high price for the rent multi-storey – more than one floor scores of – many to drive (golf balls) – to hit (golf balls) vacancies – unoccupied (flats) to soar – to go up / rise dramatically and quickly to plummet – to go down / drop dramatically and quickly to sit empty – to remain unoccupied

- 2. Circle the **time expressions** that indicate the *time frame* for the tense.
- 3. What form of the verb are the words in **bold**? Why?

Exercise 5.2

1. Complete the text by putting the verbs in the correct tense (present or past).

2. Circle any time expressions.

Using Economics: Predicting the effects of the drought of 1988

For the Midwestern United State, 1988 (1) *brought* (bring) one of the worst droughts¹ ever recorded. Corn production (2) (be) 35 percent lower than had been expected before the drought soybean production (3) (be) down more than 10 percent, and oats and barley (4) (be) down more than 40 percent. As these events (5) (develop), economists (6) (attempt) to predict their consequences, using the basic law of supply and demand that we have developed in this chapter.

The drought (7) (reduce) the amount of any crop that would be supplied at any given price. The drought can be viewed as shifting the supply curve to the left. Predictably, with a given demand curve, the large shift of the supply curve (8) (result) in² much higher prices for these farm products: corn prices (9) (rise) by 80 percent by the end of the summer, soybeans by almost 70 percent, and wheat by 50 percent.

Economists also (10) (use) the supply and demand models to predict the effects on other products. Grain (11) (be) a major input into cattle production. With cattle production less profitable, many farmers (12) (slaughter) their cattle sooner than they had originally planned. As a result, meat production (13) (rise) slightly in 1988. The increased short-run supply (14) (result) in a decrease in meat prices (adjusted for inflation). Grain (15) (be) also a major input for the production of chicken. The supply curves for chickens and eggs (16) (shift) to the left, resulting in higher prices for these commodities. The higher prices of these agricultural goods (17) (result) in a shift to the right of the demand curve for other foods which (18) (be) substitutes. Thus, prices for foods, such as vegetables and fruits, whose supply (19) (be) not affected by the Midwestern drought, still (20) (increase) – by 5 percent in July 1988 alone.

 1 drought = seca

 2 to result in = to cause

40

Past simple vs present perfect

Exercise 5.3

Conjugate the verb in an appropriate tense: past simple or present perfect. Circle the expressions that indicate a time frame. The sentences form an article that was published in *Newsweek*, Feb 22, 2010. Complete it as if you were in 2010.

FROM WORST TO NEAR FIRST

| 1. | The state of Bihar was once (be, once) the most desperate state in India. | | |
|-----|--|--|--|
| 2. | Since 2005 it <i>has transformed</i> (transform) itself to become a model for the rest of the country. | | |
| 3. | In 2005 Nitish Kumar (be elected) Chief Minister, and since his election he (do) the | | |
| | near impossible. | | |
| 4. | Over the five years that Kumar (be) in office Bihar (post) 11 per cent average | | |
| | annual economic growth. | | |
| 5. | In what (be, once) impassable badlands, the administration (lay) 6,800 kilometers | | |
| | of roads, (build) 1,600 bridges and culverts, and (cut) journey time in half in many | | |
| | areas. | | |
| 6. | Car sales (eclipse) kidnappings as crimes by roving bandits (fall) steadily from | | |
| | 1,297 to 640 and kidnappings for ransom (drop) from 411 to 66 between 2004 and 2008. | | |
| 7. | Over the past two years the number of foreign tourists (shoot up) from 95,000 to | | |
| | 356,000. | | |
| 8. | How (Kumar, achieve) this? | | |
| 9. | First, Kumar (focus) on competence over patronage. | | |
| 10. | . In other words, he (not, continue) the caste-related politics of the '80s and '90s. | | |
| 11. | He (delegate) more financial and administrative powers to officials in the field. | | |
| 12. | He (update) archaic rules that (make) civil engineers seek minister-level approva | | |
| | to spend absurdly low amounts of money. | | |
| 13. | These moves (eliminate) the huge backlogs of simple matters piled up on senior officials | | |
| | desks. | | |
| 14. | Kumar then (redefine) the basic functions of institutions and (require) offices to | | |
| | do the work they'd been assigned. | | |
| 15. | He (end) the widespread "transfer industry," which (sell) coveted bureaucratic | | |
| | posts to the highest bidders, and he (handpick) bureaucrats known for their | | |
| | competence. | | |
| 16. | He (reform) the police force and the judiciary system. | | |
| 17. | The moves (result in) nearly 39,000 convictions between 2006 and 2009, compared with | | |
| | an average of less than 10,000 in previous decades. | | |
| 18. | Those convicted (include) a dozen state legislators and members of Parliament. | | |
| 19. | In making these changes Kumar (show) that even India's darkest corner can make | | |
| | progress against crime, corruption, and caste- and creed-based demagoguery. | | |
| 20. | Kumar (break) the perception that all politicians are the same and change is impossible. | | |

TEXT TYPES

CV

Socio-cultural context

 Purpose: To persuade the reader VERY QUICKLY that the candidate has the knowledge & skills necessary for the job and so deserves to go to the next phase of the application process

Field: recruitment

• Writer-reader relation: Socially distant

Mode: written

Stages

| Administrative Name | | States name | |
|-------------------------------|------------------|---|--|
| | Personal details | States nationality, date of birth. etc. | |
| | Contact | States postal address, email address, phone number | |
| Education/ qualifications | | Lists name of degree, date awarded, institution, city, (country) | |
| | | May highlight professional knowledge in particular fields | |
| Skills & qualities | | States computing & language skills plus any other skills or qualities that are relevant for the job | |
| Professional /work experience | | Lists job title, dates, name of company, city, (country) | |
| | | Lists main tasks carried out | |
| (Awards) | | Lists awards attained, dates | |
| Interests / Activities | | Lists interests THAT ARE RELEVANT FOR JOB | |

The actual layout and organisation of the cv can vary. For example, you may choose to organise it around skills and not have a section for professional experience.

Language

The cv needs to be read quickly so it must be clear. Avoid writing sentences. In the list of job tasks carried out, use active structures with verbs, e.g. responded to customer queries rather than responsible for customer queries.

Cover letter/e-mail

Socio-cultural context

Purpose: To inform the reader what documents are being sent

• Field: correspondence

Writer-reader relation: Usually socially distant

• Mode: written

Stages

| | | Possible language |
|------------|--------------------------------|--|
| Salutation | Greet the reader | Dear Sir / Mr Smith/ etc. |
| | (Identify yourself) | I am currently completing a bachelor degree in Economics |
| Body | (Acknowledge previous contact) | In response to |
| | State purpose | Please find enclosed/attached I am sending |
| | (Indicate follow up action) | Could you please |
| Close | Write a polite ending | I look forward to hearing from you |
| | Close | Yours faithfully / sincerely |
| | Signature | |

E-mails

- 1. Write a meaningful & informative subject line.
- 2. Keep the message focussed and short.
- 3. Respect social relations in language (informal «» formal).
- 4. Keep the layout clear.
 - a. Short paragraphs
 - b. Blank line between paragraphs
 - c. Avoid fancy typefaces
 - d. Include signature line, [company*] & contact details at end of text
- 5. Proof-read for spelling, grammar & punctuation.

Letter

- 1. Follow conventions for layout (position of your address, name, position and address of recipient, date etc.)
- 2. Respect social relations in language (informal «» formal).
- 3. Proof-read for spelling, grammar & punctuation.

Useful language

| Letter | E-mail |
|----------------------|----------------------|
| Please find enclosed | Please find attached |

Application letter / Motivation letter

(sometimes referred to as a cover letter)

Socio-cultural context

 Purpose: To persuade the reader that you are a strong candidate for the job & should continue to the next round

• Field: personal experience & profile for job

• Writer-reader relation: Usually socially distant

Mode: written

Stages

| | | Possible language |
|----------------------------------|---|--|
| Salutation | Greets the reader | Dear Sir / Mr Smith/ etc. |
| Purpose | States purpose | I am writing to apply for |
| Justification, reasons, evidence | (Identifies writer) Gives reasons why writer is a strong candidate for the job. Could include: • Awareness of job tasks • Experience/professional knowledge • Skills/qualities • Enthusiasm Explains how writer acquired skills, etc. | I am currently completing a bachelor degree in Economics |
| Close | Write a polite ending | I look forward to hearing from you |
| | Close | Yours faithfully / sincerely |
| | Signature | |

Useful sequences in justification stage.

Introduce experience

(Specify relevant aspect)

Name skill/knowledge/quality developed

Create link to company/job/job tasks (<u>key terms</u>) or how it would benefit company

E.g.

As noted on my CV, I am currently completing the final year of a management degree. Several course units required the use of IT tools, which, together with my personal interest in computer-related activities and their development, has given me solid, practical experience of analysing data.

I am currently working in the call centre at my university. The experience has taught me how important the first contact with a company is, and, as a result, I am confident about approaching new companies by phone as well as by other means of communication. In addition, my Portuguese language skills enable me to reach out to companies in emerging economies like Brazil. Such communication is a vital part of growing the global community of clients for the startup.

Useful expressions

- enable me to develop
- give me a thorough understanding of ...
- give me a solid background in ...
- help me to become ...
- give me insight into ...
- (help) make me aware of how important ...

What if I don't have the experience or qualifications?

Demonstrate interest and/or

awareness of job tasks/company's value or goals and/or willingness to learn/ apply professional knowledge

E.g. I know I don't have experience in running a marketing campaign.

In today's global economy international conferences are of enormous importance. I would welcome the challenge of putting into practice the knowledge I have gained at university and look forward to helping organisations reach their target audiences.

General tips.

- Include important key terms from ad to ensure that a software program won't bypass your application.
- Sound enthusiastic.
- Refer the reader to your cv.
- Proof-read for spelling and grammar.

Useful website

https://jobs.theguardian.com/article/how-to-write-a-cover-letter/?hp

Analytical reports

Socio-cultural context

 Purpose: to assess (the extent of) a (potential) problem/situation and recommend courses of action

• Field: depends on specific context

• Writer/reader relation: usually some social distance

Mode: usually written

Stages

| Introduction | Background information | Gives background information |
|----------------------|------------------------------|--|
| | Statement of issue / problem | States the issue or problem |
| Statement of purpose | | States purpose of report |
| | (Preview means of analysis) | Lists major data categories to be used in |
| | | analysis |
| Analysis | Topic sentence | States general topic of paragraph (or |
| | | identifies analytical tools) |
| | Description | Presents and describes the |
| | | facts/data/indicators |
| | Interpretation | Discusses the evidence (e.g. implications, |
| | | impact, etc.) |
| | Mini-conclusion | Makes deductions about the interpretation |
| | | related to the purpose of report |
| Follow up | Possible courses of action | Presents a possible course of action |
| alternatives | Assessment | Assesses the advantages and disadvantages |
| | | of course of action |
| Conclusion | Conclusions | States conclusions based on and following |
| | | from analysis and follow up alternatives. |
| | | May be a reiteration of mini-conclusions |
| Recommendat | Recommendations of action | States the actions that the writer advises |
| ions | | related to purpose of the report and based |
| | | on analysis, follow up alternatives and |
| | | conclusions |

Analytical exposition

Socio-cultural context

• Purpose: To persuade the reader that the writer's position on an issue is valid

• Field: Depends on the specific context/topic

Writer-reader relation: Varies according to writer & reader

• Mode: May be spoken or written

Stages

| Introduction | (Background information) | Gives background information to the issue |
|--------------|-----------------------------|--|
| | Statement of issue | States (& describes) issue |
| | Thesis | States the writer's position on the issue |
| | (Preview of claims) | Lists topics of the claims |
| Analysis | Claim | States reason in support of the thesis |
| | (Elaboration) | Elaborates on the claim |
| | Evidence | Gives the means through which the claim is substantiated. |
| Conclusion | (Summary of claims) | Summarises main claims |
| | Reinforced thesis statement | Restates writer's position on the issue in a more forceful way |
