

**Text 3: A. G. Kenwood; A.L. Lougheed – International aspects of economic growth in the nineteenth-century: the spread of industrialization**

**Basic topics to consider**

1. Assessing the diffusion of modern economic growth (MEG) till 1913 based on the analysis of table 8.1.
2. International economic relations as an 'engine of growth'
  - 2.1. What type of economy (local, world-empire or capitalist world-economy) is the contemporary world economy ?
  - 2.2. Channels for the diffusion of MEG and how they operate
  - 2.3. Factors that facilitated and stimulated the action of those channels for diffusion
3. Reasons for the slow, non-simultaneous spread of MEG to different national economies till the First World War
