

● **flight of capital** (N-UNCOUNT)

Flight of capital is when people lose confidence in a particular country's economy, and so start to remove their money from that country. This often has the effect of making that country's economic situation worse.

The interest-rate rise should slow the flight of capital.

TI has seen its shares suffer because of a flight of capital to telecom and internet-related businesses.

● **infrastructure** (infrastructures) (N-VAR)

The **infrastructure** of a country, society, or organization consists of the basic facilities such as transport, communications, power supplies and buildings, which enable it to function.

The infrastructure, from hotels to transport, is old and decrepit. ...improvements in the country's infrastructure.

Common Collocations

an infrastructure project
infrastructure investment
infrastructure spending
infrastructure development

● **deregulate** (deregulates, deregulating, deregulated) (VERB)

deregulation (N-UNCOUNT)

To **deregulate** something means to remove controls and regulations from it. **Deregulation** is the removal of controls and restrictions in a particular area of trade.

Once wholesale prices are deregulated, consumer prices will also rise.

Deregulation of the power market is not necessarily the best option, because free market principles seldom work when there is no free market.

● **dump** (dumps, dumping, dumped) (VERB)

If one country **dumps** goods in another country, the first country exports a very large quantity of cheap goods to the second country.

The Commerce Department has ruled that the Japanese companies have been dumping minivans at unfairly low prices in the US.

The US will dump 22,000 tonnes of subsidised milk powder, butterfat and cheese onto Australia's traditional markets in Asia.

● **subsidy** (subsidies) (N-COUNT)

A **subsidy** is money that is paid by a government or other authority in order to help an industry or business, or to pay for a public service.

European farmers are planning a massive demonstration against farm subsidy cuts.

They've also slashed state subsidies to utilities and transportation.

● **recession** (recessions) (N-VAR)

A **recession** is a period when the economy of a country is doing badly, for example because industry is producing less and more people are becoming unemployed.

The recession caused sales to drop off.

We should concentrate on sharply reducing interest rates to pull the economy out of recession.

Common Collocations

a deep recession to sink into a recession
a severe recession to come out of a recession
a global recession to emerge from a recession
recession-proof recession-hit

● **inward investment** (N-UNCOUNT)

Inward investment is the investment of money in a country by companies from outside that country.

The UK is the main location in Europe for inward investment and the third largest recipient of inward investment in the world.

● **law** (laws)

① (N-SING)

The **law** is a system of rules that a society or government develops in order to deal with crime, business agreements, and social relationships. You can also use the law to refer to the people who work in this system.

It is against the law to discriminate on the basis of sex, age, marital status, or race.

Trading-standards officers suspect that many firms are breaking the law by not advertising the full cost of last-minute holidays.

② (N-COUNT)

A **law** is one of the rules in a system of law which deals with a particular type of agreement, relationship, or crime.

French lorry drivers say they will be put out of business by the new law which cuts the working week from 39 to 35 hours.

Common Collocations

to change a law to become law
to pass a law to break the law
law-abiding by law
law enforcement against the law

● **regulation** (regulations) (N-COUNT)

Regulations are rules made by a government or other authority in order to control the way something is done or the way people behave.

The European Union has proposed new regulations to control the hours worked by its employees.

Under pressure from the American government, Fiat and other manufacturers obeyed the new safety regulations.
