

# Bibliographic Databases (BDB)

Joint Research Seminars of ISEG Masters

*Elsa Fontainha*

[elmano@iseg.ulisboa.pt](mailto:elmano@iseg.ulisboa.pt)

Version 00  
Session  
3.10.2019

LISBON  
SCHOOL OF  
ECONOMICS &  
MANAGEMENT  
UNIVERSIDADE DE LISBOA

# Learning Goals

## This seminar aims to help students:

- To understand the **importance of BDB for the purposes of study and research** in the Masters, and to gain awareness of some general issues regarding BDB.
- To identify the main **BDB and their characteristics** (availability in ISEG or elsewhere; access mode; content; format and database field structure; and quality)
- To learn **how to carry out a specific search, analyze the results, create alerts, save the search history and manage it, transfer information a PC** using different formats (e.g. Excel).
- To use the **tools available in some BDB to create a personal online BDB** with login access. Add notes and attach files to each record (e.g. article) of the BDB. In personal Citations of the records are automatically updated, which enables you to carry out chain searches.
- To use the personal BDB to automatically create **lists of bibliographic references**, for example in a text format, and in any reference style, including APA, Chicago, Harvard, etc.

# INDEX

<b>1. BIBLIOGRAPHIC DATABASES (BDB) - INTRODUCTION</b>	<b>4</b>
<b>2. SOME BDB: PRESENTATION; BIBLIOGRAPHIC SEARCH</b>	<b>16</b>
<b>3. SEARCH: ANALYSING RESULTS AND SAVING INFORMATION</b>	<b>54</b>
<b>4. PERSONAL BDB: CREATION AND USE</b>	<b>70</b>
<b>5. LIST OF REFERENCES: AUTOMATIC CREATION</b>	<b>73</b>
<b>References</b>	<b>77</b>
<b>Installing ISEG's <i>Proxy</i></b>	<b>79</b>

# 1. Bibliographic Databases (BDB) - Introduction

- BDB: some uses [s. 5]
- BDB and Master Final Work (MFW) [s.6]
- BDB: Relevance and Quality [s. 9]
- Bibliographic Sources :several categories [s. 10]
- BDB and Associated Tools [s. 12]
- Bibliometric Information [s. 13]
- Bibliographic Search and Search Fields [s. 14]

***It is recommended that you enable the ISEG Proxy so that all LINKS on the following slides are accessible. The last 3 slides of this presentation explain you how to install an ISEG proxy on your computer. It is essential to know the ISEG password (associated with the email you have been assigned).***

# BDB: Some Uses

Reference BDBs (e.g. Web of Science **WoS** and **SCOPUS**) make it possible to:

- Identify what has **already been studied** in the 'universe' of research
- Find **new ideas**, determine ways to distinguish and delimit research topics
- Monitor the **impact of research**
- Recognize **research trends** across broad areas or topics
- Identify and analyze which journals are **worth reading and where to submit** your manuscript
- Identify **potential co-authors**
- Get information for **scientific career management**
- Disseminate and promote your own research through the **researcher's registration** (ResearchID ([LINK](#)) in WoS and ORCID ([LINK](#)) associated with SCOPUS / Elsevier)

Source: SCOPUS ([LINK](#)); adapted.

# **Bibliographic Databases(BDB)**

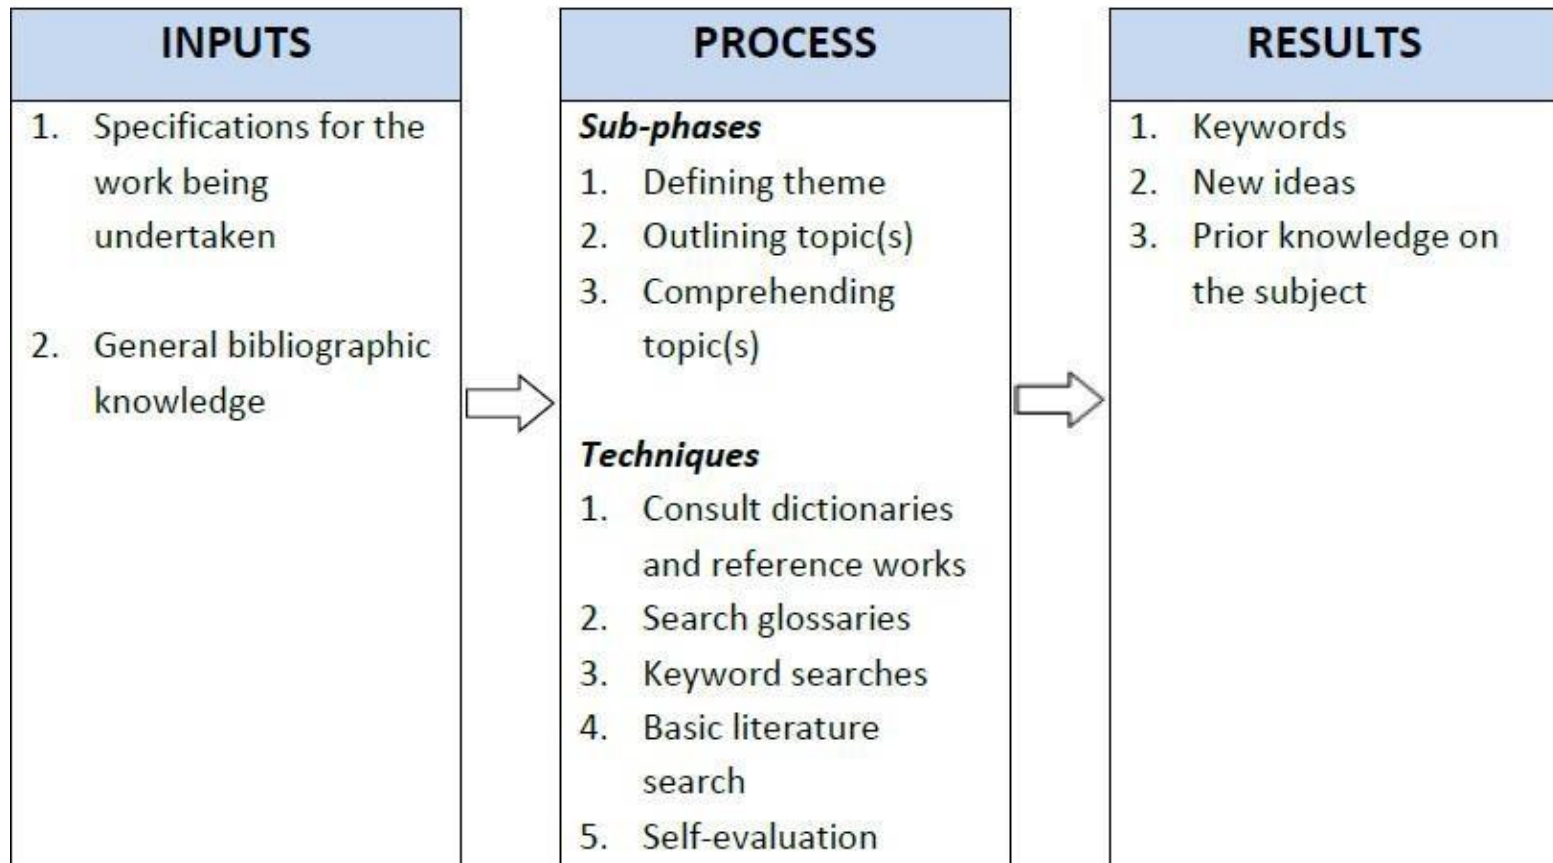

**MFW<- -> BDB**

## **MASTER FINAL WORK**

- **Dissertation**
- **Project**
- **Internship REport**

# GUIDELINES FOR WRITING THE MASTERS FINAL WORK

Figure 2 – Definition of the topic

# Master Final Work (MFW)

## List of MFWs from previous years Guidelines and Presentation Manual

The screenshot shows a web browser window displaying the ISEG website. The browser's address bar shows the URL: [https://www.iseg.ulisboa.pt/aquila/instituicao/ISEG/cursos/mestrados/trabalho-final-de-mestrado?\\_request\\_checksum\\_=541ecce39deab2faea29016ac338d1718ffc613b&lo...](https://www.iseg.ulisboa.pt/aquila/instituicao/ISEG/cursos/mestrados/trabalho-final-de-mestrado?_request_checksum_=541ecce39deab2faea29016ac338d1718ffc613b&lo...). The website header includes the ISEG logo (LISBON SCHOOL OF ECONOMICS & MANAGEMENT, UNIVERSIDADE DE LISBOA) and navigation links: Login Aquila | Contacts | Press | Newsletter | Webmail | Helpdesk | Português. A main navigation bar contains: HOME, ABOUT US, PROGRAMMES, EXECUTIVE EDUCATION, FACULTY & RESEARCH, and COMMUNITY. The breadcrumb trail is: ISEG | Programmes | Masters | Master's Final Work. The main heading is "Master's Final Work" with a "LINK" button. The content area lists four items with blue arrows: ">Upcoming Viva Voces", ">Cover & First Page" (Template of cover and first page of MFW.), ">Guidelines" (Guidelines on writing and submitting the MFW.), and ">Presentation Manual" (Formal rules to be followed when producing written assignments.). On the right, a "MESTRADOS" dropdown menu is open, showing "MASTERS" and a list of links: Applications, Useful Information, Masters & Doctorates Office, Download Brochure, Masters Graduates, Alumni, Awards, Contacts, and Request Information.

MESTRADOS

MASTERS

- Applications
- Useful Information
- Masters & Doctorates Office
- Download Brochure
- Masters Graduates
- Alumni
- Awards
- Contacts
- Request Information

# BDB Relevance and Quality

- It is important to select a BDB that is both **high quality and relevant** to the scientific field under study. It is essential to distinguish reliable resources from the others.
- A bibliographic search can be carried out with different methods and at several levels. Provided that the criteria of relevance and quality are adopted, each researcher has some flexibility to adopt their **“own” method!**
- Sometimes you have to search in **more than one database** to obtain the full text of an article. Sometimes, and if justified, it may be necessary to contact the authors directly. Some researchers make their articles available through a direct request online (for example researchers registered on the [Research Gate](#) platform)

# Bibliographic Sources and BDBs

- **The BDBs we will refer to in detail** include the Essential Scientific Publications (e.g. articles in peer review journals, or with a refereeing process)
- However, we will also mention some **repositories and archives** that integrate other types of materials, such as **Working Papers (WP) and Discussion Papers**, which we will refer to as **WP**. These are texts that have not been subject to a refereeing process.
- BDB **WOS and SCOPUS** only include publications that have been subject to a **refereeing process**. This is not the case with Google Scholar / Google Scholar.
- So what's the point of consulting WPs and other types of ongoing research?  
How do we select them?
  - WPs are one way to identify the **frontiers of research** in the area to be studied because the process of publication in scientific journals is quite time consuming (it may take several months or even years from submission to publication to rejection, multiple revisions, etc.). )
  - Make a **careful selection**: check if they have not been published subsequently in the form of articles with the same title or similar; take note of the date; choose those made available by top research and teaching institutions (e.g. INSEAD, LSE, MIT, UCL., UOxford); choose WP published by institutions such as CEPR, ECB, IMF, NBER, OECD, UN, WB, etc; and select the researchers of recognized merit.

# Bibliographic Sources and BDB (cont.)

In addition to scientific publications and WPs, there are **other sources**:

- **Technical or Policy Reports** (e.g. White Paper on the Future of Europe, EC, 2017) published by international, national or regional institutions and organizations.
- National, Community or other **legislation**.
- **Reports and studies of public or private** entities, research centers, etc.
- **Sources that should not be used as reference material** in an investigation: non-scientific journal articles or magazines, online news, commercial or personal pages, social networks, etc. NOTE: There may be **exceptions** to this general rule if the research object is directly related to these sources.

# BDB and Associated Tools

The BDB **make it possible to** search and access the **full texts** of scientific publications.

**They also** make it possible to ... (exemplifying with BDB WOS Clarivate)

- Access most **citations** (and **references**) of a particular scientific publication.
- Create **email alerts** regarding authors or articles.
- **Save the searches** made with the possibility of later **editing**.
- Create **personal BDB files** directly from your own searches.
- Generate **lists of bibliographic references** and save results and analyzes in personal files.
- To explore the potential of BDB based on informative **guides or videos** ([LINK](#))

Cont.

# BDB and Bibliometric Information

BDB also make it possible to ...

- Obtain **bibliometric information** (such as ways of constructing indicators - like the Impact Factor - and results of applying the indicators) (see JCT **Journal Citation Reports in WoS** ([LINK](#)), yearly, includes measures such as journal impact factor, journal rankings, etc.). Infographics about JCR ([LINK](#))
- Bibliometric information is one way to identify **journals, authors or topics with greater relevance or impact** (for example in a given scientific domain, research area, country or period). These metrics are used, together with other elements, in the evaluation of the scientific and technological systems of many countries, namely Portugal, for example by the Foundation for Science and Technology ([Carta de Princípios da FCT 2016](#)). There is a vast literature in the field of scientific information, bibliometrics and research policy published for example in [Journal of Informetrics](#) , [Scientometrics](#), [Research Policy](#) The Leiden Manifesto suggests ten principles that should guide the evaluation of the research [Hicks et al. \(2015\)](#) ( [em pt br](#)). [For a recent analysis of journal metrics see for example Heckman & Moktan \(2018\).](#)

# Bibliographic Search and Search Fields

- The reference BDBs generally have **2 search modes**: the simple one (**Search or Basic Search**) and the advanced one (**Advanced Search**). Some details about advanced search can be found in WOS in [LINK](#).
- In Advanced Search, **Boolean operators** (AND, OR, NOT, SAME, NEAR) are used. **Truncations** may also be applied to the search word or phrase in which part is replaced by the symbol \* (e.g. *Europe\** may correspond to Europe, European, Europeans, etc.). For an explanation of the use of Boolean operators (example [here](#)) and truncations (example [here](#)). (In PT the [LINK](#) B- On).
- Before doing a search in a BDB it is necessary to **identify the fields of each of the records** (for example, in a search select only the publications of a given year, an author or authors, and associated with a given keyword. The classification of JEL (*Journal of Economic Literature*) codes. The **JEL codes** are frequently used together with keywords can be found in [LINK](#).

# Bibliographic Search and Search Fields

## WoS Search Fields

The search can be carried out by different fields. Illustration of the fields with the **WoS Clarivate fields for na Advanced Search (\*)** ([LINK](#)):

**TS= Topic (\*\*)**

TI= Title

AU= Author ([Index](#))

AI= Author Identifiers

GP= Group Author ([Index](#))

ED= Editor

SO= Publication Name ([Index](#))

DO= DOI

PY= Year Published

CF= Conference

AD= Address

OG= Organization-Enhanced ([Index](#))

OO= Organization

SG= Suborganization

SA= Street Address

CI= City

PS= Province/State

CU= Country

ZP= Zip/Postal Code

FO= Funding Agency

FG= Grant Number

FT= Funding Text

SU= Research Area

WC= Web of Science Category

IS= ISSN/ISBN

UT= Accession Number

PMID= PubMed ID

(\*) See also Advanced Search in SCOPUS([LINK](#)).

(\*\*) The word(s) inserted in 'Topic' in WoS BDB is searched in the following fields of the record: **Title, Abstract, Author Keywords, e Keywords Plus®** . Other BDB allow the search exclusively in one field (for example abstract or keyword)

## 2. SOME BDB: PRESENTATION BIBLIOGRAPHIC SEARCH

- BDB Availability (in ISEG or other); Access Mode; Content; Form and Fields of Research (short illustrative videos) [s. 17]

ISEG | Faculty & Research | **Library**

### Library

LINK

### Francisco Pereira de Moura Library

LINK

The Francisco Pereira de Moura Library is ISEG's literary resource centre, housing a wide range of literature and information both in digital and paper format, which can be accessed in person or online.

It is considered to be the most important university library in Portugal for the following subjects: economics and business, maths, sociology, history and law. This is due to several factors, including the many years that it has been in operation, the diversity of its resources and the fact that it is kept constantly updated.

The library is perfectly suited for its purpose and is located in an ideal location. It is dynamic, both culturally and scientifically, and has close links to the university and the wider community.

» [Visit the Francisco Pereira de Moura library webpages](#)

### Online Library

LINK

The Online Library includes a wide range of resources such as databases, documents, Masters Final dissertations and doctoral theses. It is fully accessible from a number of computers located within the Francisco Pereira de Moura Library, or via the building's Wi-Fi network. ISEG students can also access the Online Library off-campus, provided they have configured their equipment to do so.

# Bibliographic Databases (BDB)

<b>WOS Web of Science</b> Clarivate Analytics	 WEB OF SCIENCE™
<b>Scopus</b>	
<b>Google SCHOLAR</b> <i>(Google Académico)</i>	
Cont.	

# Bibliographic Databases (BDB)

<b>BDB</b>	
Catálogo Bibliográfico	 The logo for 'Catálogo Bibliográfico' features the text 'Catálogo Bibliográfico' in a grey sans-serif font above a horizontal line. Below the line is a stylized graphic of four vertical bars in blue, red, and green.
Econlit	 The logo for 'ECONLIT' consists of a yellow square containing a glowing lightbulb with a flame. To the right of the lightbulb, the word 'ECONLIT' is written vertically in a blue, bold, sans-serif font.
<b>B-On</b> This B-ON includes resources from different sources: BDB reference (WOS, EBSCO, etc.) Libraries (British Library, Library of Congress, etc.) Access to the full text on the pages of the main publishers (Elsevier, Springer, Sage, etc.)	 The logo for 'B-On' features the text 'biblioteca do conhecimento online' in a small, grey, sans-serif font. To the right of this text is a large, stylized 'on' in a red, rounded font, with a white dot above the 'o'.

# Bibliographic Databases (BDB)

## JSTOR

- Includes full text of the main journals of **Economics, Management, Finance, Econometrics, Mathematics**, etc. Full text of articles for reading and / or download. In the pdf download are included the list of citations references. Also includes ebooks and other resources.
- For each journal is **clearly identified the period included** (usually since the foundation of the journal). There is always a **lag** of a few years in relation to the year of publication. Reason why **WoS** is in general more used than JSTOR. However, for seminal texts the JSTOR is sometimes essential.
- The **list of JSTOR journals** for each of the scientific fields can be consulted ([LINK](#)).
- It is possible to create a personal free **account in JSTOR**. ([LINK](#)).

# Web of Science (WoS)

- **Web of Science (WoS)** ( former **Web of Knowledge WoK**) developed and owned by Clarivate Analytics.
- **SCOPUS BDB is an alternative to BDB WoS** (see next slide).
- WoS includes 6 bases: *Science Citation Index Expanded (SCI-Expanded)*; *Social Sciences Citation Index (SSCI)*; *Arts & Humanities Citation Index (A&HCI)*; *Conference Proceedings Citation Index - Science (CPCI-S)*; *Conference Proceedings Citation Index - Social Sciences & Humanities (CPCI-SSH)*; and *Emerging Sources Citation Index (ESCI)*. And also: *Index Chemicus (IC)* and *Current Chemical Reactions (CCR-Expanded)*.
- The *Master Journal List* [LINK](#)) includes +23.000 titles\*. Only journals that adopt the peer-review process are included. The process of selection explained by in *Journal Selection Process* ([Testa 2018](#))
- Publishes several metrics of science [metrics](#) used to evaluate publications, research centers, authors etc.
- Has a lot of tools that help the research activity (some of them will be presented during the seminar)
- Several guides and video guides are available on WoS Clarivate webpage ([here](#))

Source: Araújo & Fontainha (2018 , 2017b)

\* Last update 01.09.2019

## Web of Science (WoS) and SciELO

- The most frequent criticisms of WoS are: insufficient coverage of certain publications (e.g. books); and scientific publications not published in English are very few in this BDB.
- For **publications in Portuguese and Spanish**, consult the SciELO bibliographic base. SciELO, associated with WoS, intends to "cover research in Latin America, Spain, Portugal, the Caribbean and South Africa".
- SciELO includes about 650 titles, more than double the titles that are also part of WoS. SciELO Brasil is updated weekly (<http://www.scielo.br/>)
- How to use the SciELO website([link](#))

- **BDB SCOPUS**, developed and owned by Elsevier publisher, is presented on its website as the largest database of peer-reviewed literature: scientific journals, books and conference proceedings ([LINK](#))
- SCOPUS covers different areas: Science, Social Science, Arts & Humanities.
- **SCOPUS includes:** 75 million of records\*, more than 24.600 titles\* and +8 millions of conference papers\*.
- In SCOPUS basic and advanced search area available. The fields are diverse ([LINK](#))
- *Most of the articles include Abstract . Is possible to follow the citations for a record (using Citation Tracker).*
- **Compared with WoS** has the advantage of covering better the Journals including additional outputs like books and covering better non-US sources.

Source: Araújo & Fontainha (2018, 2017b)

- The GS includes **several types of documents / materials**: papers with and without peer-reviews, abstracts, journals published on paper and others online, conference proceedings, books, theses, pre-publications, technical reports, monographs, patents and legal documents .
- GS includes **all fields of knowledge**. For example in Classical Papers a listing of these fields ( [LINK](#) ) can be found.
- The GS **does not define the total number of journals**, the list of journals or the period covered.
- For a document with the same title and authorship, GS includes **all versions** of the same record that are available online.
- GS generates and disseminates **bibliometric indicators** ([LINK](#)).
- Because the coverage of the articles is unknown, there is a consensus in the scientific community regarding the **inadequacy of the GS for some bibliometric analyzes** such as citation analysis. In several journals linked to scientific information (e.g. [Journal of Informetrics](#), [Scientometrics](#), etc.) articles can be found discussing the **relative quality of GS versus WOS and Scopus**.
- Using a gmail account and after login, you can **save search results** to the GS and create alerts.
- Authors can create a **Google Scholar Account Profile**. This profile is fed automatically, as is the number of citations. This automatic process generates frequent errors in authoring.

# Selection of the Top Journals by Subject Areas(WoS)

- The journals in WoS are organized by Areas (Subject Areas; Categories) and the scope of each one of them is defined ([LINK](#))
- 
- Each journal can belong to more than one area.
- In the following two slides some examples of the scope of each of the areas are presented.

The screenshot shows the 'InCites™ Help' page. At the top right is the Thomson Reuters logo and a search bar. The main content area is titled 'WEB OF SCIENCE SUBJECT AREAS'. Below the title, there is a paragraph explaining the scheme and a list of links to 'View Scope Notes' for three journal categories: Science Citation Index Expanded Journals, Social Sciences Citation Index Journals, and Arts & Humanities Citation Index Journals. A note states: 'Note: Articles from multidisciplinary journals may be reclassified into specific subject areas. See [Reclassification of Papers in Multidisciplinary Journals for Creation of Thomson Reuters Field Baselines](#).' The left sidebar contains a navigation menu with various categories like 'What's New', 'Global Comparisons', and 'Subject Area Schemes'. The browser's address bar at the bottom shows the URL: 'ipscience-help.thomsonreuters.com/incitesLive/globalComparisonsGroup/globalComp'.

# Scope of WoS Subject Areas

## Some Examples

[...]

### **Business, Finance**

*Business, Finance covers resources primarily concerned with financial and economic correlations, accounting, financial management, investment strategies, the international monetary system, insurance, taxation, and banking.*

[...]

### **Economics**

*Economics covers resources on all aspects, both theoretical and applied, of the production, distribution, and consumption of goods and services. These include generalist as well as specialist resources, such as political economy, agricultural economics, macroeconomics, microeconomics, econometrics, trade, and planning.*

Source: WoS([LINK](#))

# Scope of WoS Subject Areas

## Some Examples

### (cont.)

[...]

#### **Management**

*Management covers resources on management science, organization studies, strategic planning and decision-making methods, leadership studies, and total quality management.*

[...]

#### **International Relations**

*International Relations covers resources concerned with foreign policy, comparative world politics, world commerce and trade, international legal issues, peace studies and conflict resolution, military alliances, and strategic studies.*

[...]

#### **Planning & Development**

*Planning & Development is concerned with resources on the economics and social development of both underdeveloped and industrialized areas. The resources in this category focus on subjects such as economic forecasting, development studies, policy-making strategies, theories of planning, and the growth of the third world.*

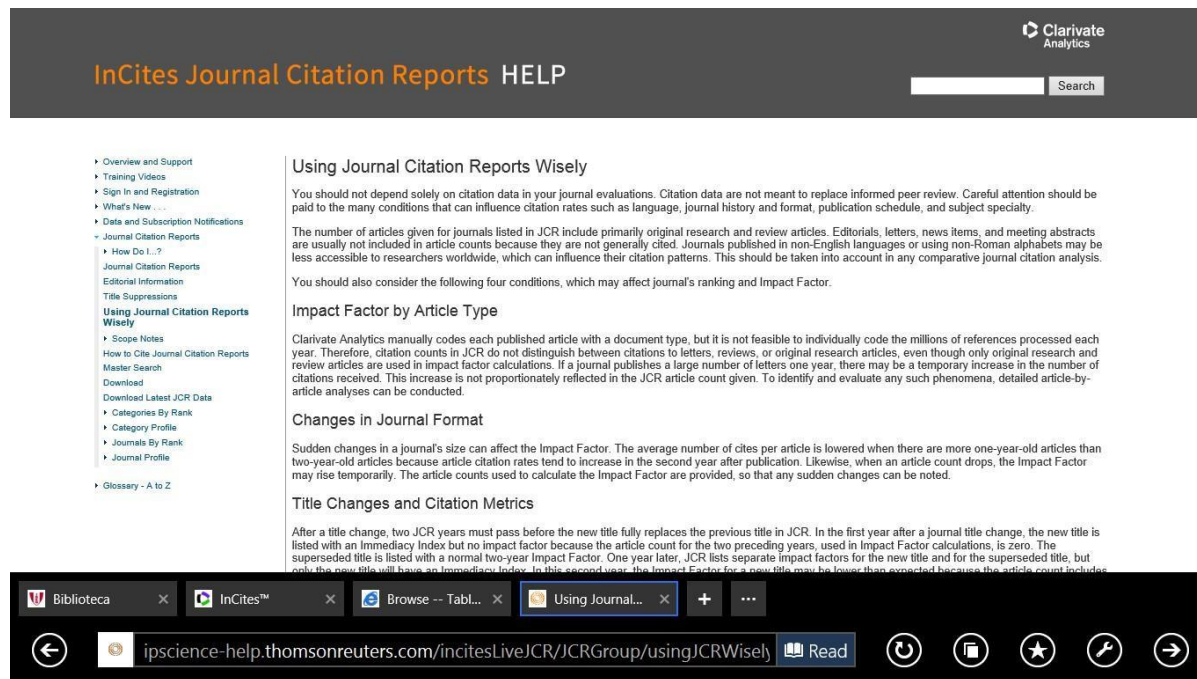

[...]

# Evaluation of Journals

## Metrics and Bibliometrics

- The evaluation of journals can be done qualitatively and quantitatively. Several metrics exist and are developed.
- The explanation of some of these metrics that enable impact analyzes and the relative importance of journals, authors, etc. is in this [LINK](#)

### Using Journal Citation Reports Wisely

You should not depend solely on citation data in your journal evaluations. Citation data are not meant to replace informed peer review. Careful attention should be paid to the many conditions that can influence citation rates such as language, journal history and format, publication schedule, and subject specialty.

The number of articles given for journals listed in JCR include primarily original research and review articles. Editorials, letters, news items, and meeting abstracts are usually not included in article counts because they are not generally cited. Journals published in non-English languages or using non-Roman alphabets may be less accessible to researchers worldwide, which can influence their citation patterns. This should be taken into account in any comparative journal citation analysis.

You should also consider the following four conditions, which may affect journal's ranking and Impact Factor:

#### Impact Factor by Article Type

Clarivate Analytics manually codes each published article with a document type, but it is not feasible to individually code the millions of references processed each year. Therefore, citation counts in JCR do not distinguish between citations to letters, reviews, or original research articles, even though only original research and review articles are used in impact factor calculations. If a journal publishes a large number of letters one year, there may be a temporary increase in the number of citations received. This increase is not proportionately reflected in the JCR article count given. To identify and evaluate any such phenomena, detailed article-by-article analyses can be conducted.

#### Changes in Journal Format

Sudden changes in a journal's size can affect the Impact Factor. The average number of cites per article is lowered when there are more one-year-old articles than two-year-old articles because article citation rates tend to increase in the second year after publication. Likewise, when an article count drops, the Impact Factor may rise temporarily. The article counts used to calculate the Impact Factor are provided, so that any sudden changes can be noted.

#### Title Changes and Citation Metrics

After a title change, two JCR years must pass before the new title fully replaces the previous title in JCR. In the first year after a journal title change, the new title is listed with an Immediacy Index but no impact factor because the article count for the two preceding years, used in Impact Factor calculations, is zero. The superseded title is listed with a normal two-year impact factor. One year later, JCR lists separate impact factors for the new title and for the superseded title, but only the new title will have an Immediacy Index. In this second year, the Impact Factor for a new title may be lower than expected because the article count includes

# Journal Citation Report and Journal Rankings

## Category: Business, Finance ([LINK](#))

The screenshot displays the InCites Journal Citation Reports interface. The main content area shows a table titled "Journal Titles Ranked by Impact Factor" under the "Journals By Rank" tab. The table lists five journals with their respective impact factors and Eigenfactor scores. A download menu is open, showing options for PDF, CSV, and XLS. A blue arrow points to the "Select Categories" button in the left sidebar.

# Collaboration between WoS and Google Scholar

## Crossed References

([LINK](#))

The screenshot shows the top navigation bar with links for Support, Contact Us, and Corporate website. The main header features the Clarivate Analytics logo and the Web of Science tagline "Trust the difference". A search bar is present with the text "Site Search". A purple notification box in the top right corner reads "CD Drive (D:) bandalarga moved Tap to choose what happens with this disc." Below the header is a secondary navigation bar with links for About, Products & Tools, Benefits & Resources, Training & Support, News & Events, and Contact Us. The main content area has a breadcrumb trail "Web of Science > Google Scholar and Web of Science". A large blue banner with an orange underline contains the text "WEB OF SCIENCE & GOOGLE SCHOLAR COLLABORATION" and "Web of Science is instantly discoverable from a Google Scholar search!". Below the banner is a "SUBSCRIBER LOGIN >" button. The left sidebar contains sections for "PRODUCT ACCESS", "MOST POPULAR", "SUPPORT", and "FAQS" with sub-links for Arabic, German, Farsi, and French. The main text area explains the collaboration, stating that it gives researchers an intuitive way to access and evaluate information easily. It describes how the collaboration facilitates the seamless movement between the open web to Web of Science and its trusted content through citations. It lists three benefits: finding a list of sources, linking out to full-text articles, and utilizing key metrics to identify crucial sources. It also mentions that librarians discuss how to easily access Open Access journals and how this has improved the researcher's experience overall, with a "Listen now >>" link. At the bottom, it asks if the user needs access to the Web of Science and Google Scholar reciprocal linking, with a "Contact us now" link.

(\*) Joseph Stiglitz (1943- ) Nobel Prize of Economics 2001 ([LINK](#))

# Registration in WoS → uses of multiple WoS tools

The screenshot displays the Web of Science user interface. At the top, a navigation bar includes links for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. On the right side of this bar, there are links for 'Sign In', 'Help', and 'English'. Below the navigation bar, the 'Web of Science' logo is prominently displayed. A search bar is located below the logo, with a dropdown menu currently showing 'Web of Science Core Collection'. A blue arrow points from the search bar area towards the 'Sign In' and 'Register' options in the top right corner. The 'Register' option is highlighted with a blue box. Below the search bar, there are tabs for 'Basic Search', 'Cited Reference Search', and 'Advanced Search'. The 'Basic Search' tab is selected. A search input field contains the text 'Example: oil spill\* mediterranean'. To the right of the input field is a 'Search' button. Below the search input, there are options to '+ Add Another Field' and 'Reset Form'. At the bottom of the page, there is a 'TIMESPAN' section with radio buttons for 'All years' and 'From 1900 to 2017'. A 'MORE SETTINGS' link is also visible. The browser's address bar at the bottom shows the URL 'https://apps.webofknowledge.com/WOS\_GeneralSearch\_input.do?produ'.

# After registration and *login*...is possible to Search, Save Search Results and Search History; create a personal BDB (Endnote online); Create Profile of Researcher (*ResearchID*), etc.

The screenshot shows the Web of Science search interface. At the top, there are navigation tabs for various databases: Web of Science, InCites, Journal Citation Reports, Essential Science Indicators, EndNote, and Publons. On the right, there are links for Bases, Help, and English. The main header features the 'Web of Science' logo and the Clarivate Analytics logo. Below the header, there is a 'Search' section with a dropdown menu for 'Select a database' set to 'Web of Science Core Collection'. A blue arrow points from the 'Search' text to the 'My Tools' dropdown menu, which is open and shows options: 'Saved Searches & Alerts', 'EndNote', and 'ResearcherID'. Below this, there are search options: 'Basic Search' (selected), 'Cited Reference Search', 'Advanced Search', and '+ More'. The search input area contains two fields: 'development\*' (Topic) and 'Stiglitz, J\*' (Author), with 'AND' as the operator. A blue box highlights the search input area. A 'Search' button is visible. Below the search area, there is a 'TIMESPAN' section with a radio button for 'All years' and a range selection for 'From 1900 to 2017'. At the bottom, there is a browser address bar showing the URL: [https://apps.webofknowledge.com/WOS\\_GeneralSearch\\_input.do?produ](https://apps.webofknowledge.com/WOS_GeneralSearch_input.do?produ). The browser interface includes a back button, a refresh button, and a search button.

# Example C: Save the results of a search in a personal area

The screenshot shows the Web of Science interface. At the top, there is a navigation bar with various databases and a search bar. The 'Search History' button is highlighted with a red box. Below the search bar, the 'Search History' section is visible, showing a dropdown menu for 'Web of Science Core Collection' and a 'Learn More' link. A red box labeled 'Save searches' points to the 'Save History / Create Alert' button. Below this, a table lists search results with columns for 'Set', 'Results', and search details. A red box labeled 'Edit and combine searches' points to the 'Edit Sets' column, which includes 'Combine Sets' (AND/OR), 'Select All', and 'Delete' options. The table contains four search entries, each with an 'Edit' button and checkboxes for 'Combine' and 'Delete'.

Set	Results	Search Details	Edit Sets	Combine Sets	Delete Sets

# Example C: Refine Results (by Journal, type of document, year, etc.)

The screenshot shows the Web of Science search results interface. At the top, there are navigation tabs for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. The 'Web of Science' logo is prominently displayed on the left. The search results are for 'AUTHOR (Stiglitz, J\*) AND TOPIC: (development\*)'. The results are sorted by 'Publication Date -- newest to oldest' and show 31 results on page 1 of 4. A sidebar on the left contains a 'Refine Results' section, which is circled in blue. A blue arrow points from the 'Refine Results' section to the search criteria. The main results list includes three articles, each with a checkbox, a title, author information, journal information, and a 'View Abstract' button. The first article is 'From global savings glut to financing infrastructure' by Arezki, Rabah; Bolton, Patrick; Peters, Sanjay; et al. The second is 'The Rationale for Industrial and Innovation Policy' by Cimoli, Mario; Dosi, Giovanni; Stiglitz, Joseph. The third is 'Leaders and followers: Perspectives on the Nordic model and the economics of innovation' by Stiglitz, Joseph E. On the right side, there are options to 'Create Citation Report' and 'Analyze Results', along with 'Times Cited' and 'Usage Count' information for each article.

The bottom of the image shows the Windows taskbar and the browser address bar. The taskbar includes icons for 'Web of Scienc...', 'EndNote', and a '+' sign. The browser address bar shows the URL 'https://apps.webofknowledge.com/Search.do?product=WOS&SID=1FnMYEo'. The browser interface includes a back button, a search icon, and a 'Read' button.

# Example C: Save the results of a search (articles) in a personal file (on line or in PC)

The screenshot shows the Web of Science search results page. The top navigation bar includes 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', 'Publons', 'Bases', 'Help', and 'English'. The 'Web of Science' logo is on the left, and 'Clarivate Analytics' is on the right. The search bar is at the top left, and 'My Tools', 'Search History', and 'Marked List' are on the right. The main content area shows search results sorted by 'Publication Date -- newest to oldest'. The first result is 'From global savings glut to financial...'. A context menu is open over this result, showing options: 'Save to EndNote online', 'Save to EndNote desktop', 'Save to ResearcherID - I wrote these', 'Save to InCites', and 'Save to Other File Formats'. The 'Save to Other File Formats' option is highlighted. The second result is 'The Rationale for Industrial and Innovation Policy' and the third is 'Leaders and followers: Perspectives on the Nordic model and the economics of innovation'. The left sidebar shows 'Results: 31' and 'Refine Results' with a search box and 'Publication Years' filter. The bottom of the image shows a Windows taskbar with a browser window titled 'Web of Scienc...' and the address bar containing 'https://apps.webofknowledge.com/Search.do?product=WOS&SID=Q11xB8R...'. The taskbar also shows icons for back, forward, refresh, and search.

# Example C: Save the results of a search (articles) in a personal file (on line or in PC)

The screenshot displays the Web of Science interface. At the top, navigation tabs include 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. The 'Web of Science' logo is prominent on the left, and 'Clarivate Analytics' is on the right. A search bar is located at the top center. Below the search bar, the interface shows search results for 'TOPIC: (development\*) AND AUTHOR: (Stiglitz, J\*)'. A 'Send to File' dialog box is open in the center, allowing users to export search results. The dialog box includes options for the number of records (1 to 31), record content (Full Record), and file format (Tab-delimited (Win)). The background shows a list of search results, including articles by Stiglitz, Joseph E. and Cimoli, Mario; Dosi, Giovanni. The bottom of the image shows a browser window with the URL 'https://apps.webofknowledge.com/Search.do?product=WOS&SID=Q11xB8R...' and a taskbar with various application icons.

# Example C: Save selected results in txt format that can be imported in word or excel format (*all fields of the record can be selected: abstract, key-words, number of citations, etc.*)

Text Import Wizard - Step 1 of 3

The Text Wizard has determined that your data is Delimited.  
If this is correct, choose Next, or choose the data type that best describes your data.

Original data type

Choose the file type that best describes your data:

- Delimited - Characters such as commas or tabs separate each field.
- Fixed width - Fields are aligned in columns with spaces between each field.

Start import at row: 1 File origin: Windows (ANSI)

My data has headers.

# Example C: The results (31 documents) are saved in excel format. Each column = database field (e.g. column AB = Abstract of the document)

The screenshot shows an Excel spreadsheet with the following data in the first few rows:

Row	Column	Value
2	AB	This paper proposes an institutional solution that can help unlock the flow of low yielding long-term savings towards high-return infrastructure investments. The solution is to
3	AB	This paper proposes an institutional solution that can help unlock the flow of low yielding long-term savings towards high-return infrastructure investments. The solution is to transform public-private partnerships (PPPs) in infrastructure as well as the classic model of multilateral development banks. Instead of thinking of PPPs as bilateral contracts between a private concession operator and a government agency, we argue that they should be conceived as partnerships that also involve a development bank and long-term institutional investors as partners. We propose a new model for development banks, which is to transform them into originate-and-distribute banks for PPP infrastructure projects. The new model allows them to conserve their valuable capital and leverage their expertise and capabilities by making them available to long-term institutional investors.

## 4. PERSONAL BDB: CREATION AND USE

- ❑ In WoS is possible to create your **personal BDB online** that can be customized and completed with your comments, files etc.
- ❑ The individual BDB allows **organization and management** of bibliographic references.
- ❑ From the individual BDB, **lists of bibliographic references** can be created in different formats.
- ❑ **EndNote** (version not online; **software** to be installed in computer) can be connected to Word software making it possible to automatically insert references and written citations in your own written text. These features also exist in the Mendeley program ([link](#))
- ❑ When the bibliographic search is in WoS, the records that are **already in your personal BDB WoS** are marked with an icon:

# Example C: Save #31 references (Save to EndNote online)

The screenshot displays the Web of Science search results page. The top navigation bar includes 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. The 'Web of Science' logo is prominent on the left, and 'Clarivate Analytics' is on the right. The search results are sorted by 'Publication Date -- newest to oldest' and are on 'Page 1 of 4'. A blue arrow points to the '5K' icon, which has opened a context menu with the following options: 'Save to EndNote online', 'Save to EndNote desktop', 'Save to ResearcherID - I wrote these', 'Save to InCites', and 'Save to Other File Formats'. The 'Save to EndNote online' option is highlighted. The search results list three items:

- 1. **From global savings glut to financial crisis**  
By: Arezki, Rabah; Bolton, Patrick; **ECONOMIC POLICY** Volume: 3... 2017
- 2. **The Rationale for Industrial and Innovation Policy**  
By: Cimoli, Mario; Dosi, Giovanni; **Stiglitz, Joseph**  
REVISTA DO SERVIÇO PÚBLICO Volume: 66 Special Issue: SI Pages: 55-68 Published: OCT 2015
- 3. **Leaders and followers: Perspectives on the Nordic model and the economics of innovation**  
By: **Stiglitz, Joseph E.**  
JOURNAL OF PUBLIC ECONOMICS Volume: 127 Special Issue: SI Pages: 3-16 Published: JUL 2015

On the left, there are sections for 'Results: 31', 'Refine Results', and 'Publication Years'. On the right, there are options to 'Create Citation Report', 'Analyze Results', and 'Usage Count' for each result.

At the bottom, the browser address bar shows the URL: <https://apps.webofknowledge.com/Search.do?product=WOS&SID=Q11xB8Rf>

# Example C: Save the #31 Results in a Personal BDB (EndNote online)

The screenshot displays the Web of Science search results page. At the top, navigation tabs include 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. The 'Web of Science' logo is prominent on the left, and 'Clarivate Analytics' is on the right. A search bar is located below the logo. The main content area shows 'Results: 31' from the 'Web of Science Core Collection'. A blue arrow points to the 'Sort by: Publication Date -- newest to oldest' dropdown menu. A dialog box titled 'Send to my.endnote.com' is open, showing options for the number of records (radio buttons for 'All records on page' and 'Records 1 to 31') and a dropdown for 'Record Content' set to 'Full Record'. Below the dialog, three search results are visible, each with a checkbox and a 'View Abstract' button. The first result is 'The Rationale for Industrial and Innovation Policy' by Cimoli, Mario; Dosi, Giovanni; Stiglitz, Joseph. The second is 'Leaders and followers: Perspectives on the Nordic model and the economics of innovation' by Stiglitz, Joseph E. On the right side, there are options for 'Create Citation Report' and 'Analyze Results', along with 'Usage Count' for each result.

## 5. LIST OF REFERENCES: AUTOMATIC CREATION

To automatically generate a list, follow the following steps:

- Login to personal BDB (EndNote online)
- Select references to be included in the bibliographic list (a specific reference folder in your personal BDB)
- Select reference style (e.g. APA, Harvard, Chicago)
- Select Save, Email, or Preview/Print to automatically produce a list in text format.

# Example C: Create a list of references

**To access most of the Bibliographic Databases analyzed  
it is necessary to Install ISEG's Proxy →**

***“Accessing the databases from outside the School lack the configuration of the proxy in your internet browser. Configure your proxy with the following: proxy: proxy.iseg.ulisboa.pt  
port: 3128***

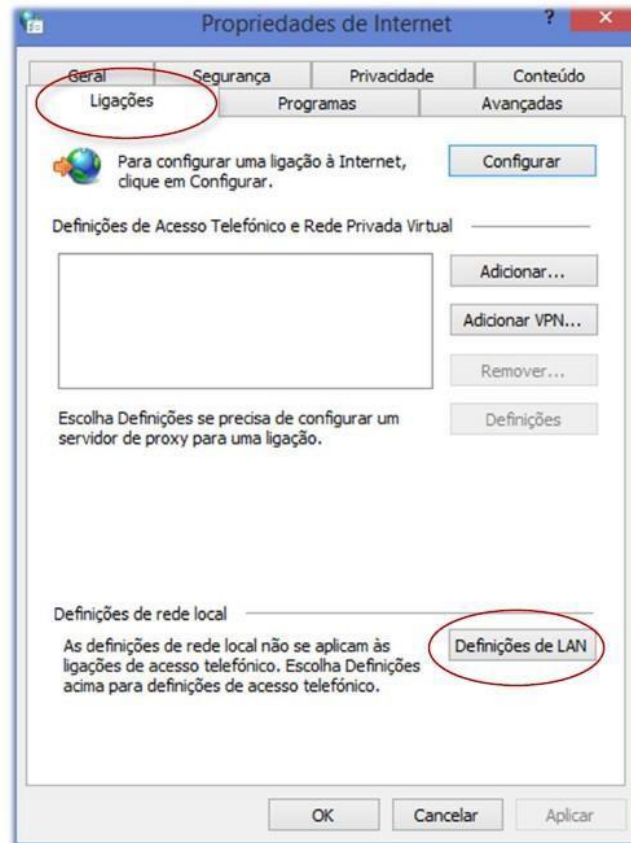

***For more information, please check the [manuals](#) in the publications page.  
When accessing the internet, your username and password will be requested.”***

Maria Helena Vieira da Silva

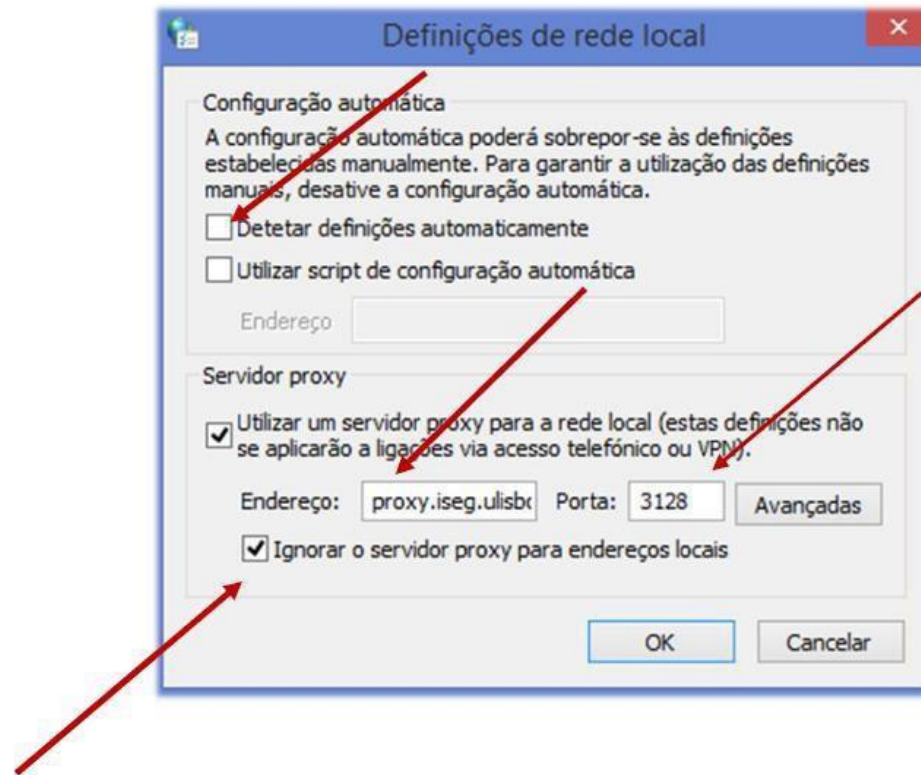

# CONFIGURATION OF THE CLIENT PROXY

- 1- CLICK ON "START"
- 2- CLICK ON "CONTROL PANEL"
- 3- CLICK ON "INTERNET OPTIONS"
- 4- ON THE "CONNECTIONS" TAB, CLICK ON "LAN SETTINGS"

- 5- UNCHECK "AUTOMATICALLY DETECT SETTINGS"
  - 6- CHECK "USE A PROXY SERVER FOR YOUR LAN..."
  - 7- IN THE "ADDRESS" FIELD WRITE "proxy.iseg.ulisboa.pt", AND IN THE "PORT" FIELD WRITE "3128"
- CHECK "BYPASS PROXY SERVER FOR LOCAL ADDRESSES"

WHEN YOU ACCESS ANY INTERNET SITE, AN AUTHENTICATION WINDOW WILL APPEAR. WRITE THE USERNAME AND PASSWORD THAT YOU USE AT ISEG.
