Notes: In the exam, Part A, there were 0.5 marks for each right answer and a 0.15 deduction for each wrong answer; the quiz mark counts with a 25% weight to the final grade only if the following two conditions hold: you got at least 7.0 in the exam and the quiz mark exceeds the exam's; otherwise, if you got less than 7.0 in the exam or if the quiz grade is less than that of the exam, your final grade is simply the exam grade; blank cells mean you did not take the quiz/exam.
