EBH 25/26 (1st Term) – TUTORIAL

ASSIGNMENT 1 (1.5 pts of the Final Mark)

1. Next tutorial, each group will explore one of the ‘growth characteristics’ indicated by Kuznets in Text 1 (Kuznets, ‘Modern Economic Growth’).
2. Students must find one empirical material (in a graph or a table format) that confirms the whole of a given characteristics of Modern Economic Growth and place it in one slide
3. Growth characteristics are assigned as follows:

GROUP A – characteristic 1)

GROUP B – characteristic 2)

GROUP C – characteristic 3)

GROUP D – characteristic 4)

GROUP E – characteristic 5)

GROUP F – characteristic 7) (nota bene: ‘7’ is not a mistake)

4. The materials chosen should illustrate Kuznets’ argument, though they can be relative to only one of the developed countries.
5. Any student can be called for presentation and I individual group members.
6. Marks are only given to the students attending the tutorial.
7. It is not essential that all students speak during presentations. The marks will be the same for all students in the group, unless I find that one or more students are unprepared for the presentation.

Good Work,
