

Lab 4

(Prof. Carlos J. Costa)

1) Ask the user to insert his name and age. Then, calculate his birth year.

▶ In [3]:

```
""" """
```

2) Ask the user to insert a text. The program will always answer "yes". The conversation will be closed when the user says "bye".

▶ In [4]:

```
""" """
```

3) Create a function for a greeting

▶ In [5]:

```
""" """
```

4) Call greeting function at the beginning of the conversation.

▶ In [6]:

```
""" """
```

5) Improve your chatbot

▶ In []:

```
""" """
```
