MENDELEY

Biblioteca Mendeley Desktop – Adição e importação de documentos

The screenshot shows the Mendeley Desktop application window. The 'File' menu is open, with several options highlighted by orange boxes and arrows. Two text boxes provide instructions in Portuguese:

- Adicione documentos, referências e faça entradas manuais** (Add documents, references and make manual entries) - points to the 'Add Files...', 'Add Folder...', and 'Watch Folder...' options.
- Importe documentos ou bibliotecas inteiras em formatos .bib, .xml, ; .ris e zotero.sqlite** (Import documents or entire libraries in formats .bib, .xml, ; .ris and zotero.sqlite) - points to the 'Import...' option.

The main window displays a list of documents with columns for Authors, Title, Published In, Added, and Details. A 'Filter by Authors' sidebar is visible on the left, and a 'No documents selected' message is shown on the right.

MENDELEY

Biblioteca Mendeley Desktop – Filtragem e busca de documentos

The screenshot displays the Mendeley Desktop application window. The main area shows a list of documents with columns for Authors, Title, Year, Published In, and Added. A search bar is located at the top right, and a filter menu is open on the left side, showing a list of authors. Two text boxes with arrows point to the search bar and the filter menu, providing instructions in Portuguese.

ZOTERO

The screenshot displays the Zotero application window. On the left is a sidebar with a tree view containing 'My Library', 'Lab Reports', 'My Publications', 'Duplicate Items', 'Unfiled Items', and 'Trash'. The main area shows a table of references with columns for Title, Creator, and Year. The selected item is 'Puppy parties and beyond: the role of early age socialization pr...' by Howell et al., 2015. On the right, a detailed view of this item is shown under the 'Info' tab, listing metadata such as Item Type (Journal Article), Title, Author (Howell, Tiffani J., King, Tammie, Bennett, Pauleen C.), Publication (Veterinary Medicine: Research & Reports), Volume (6), Issue, Pages (143-152), Date (2015), and Date Added (3/9/2018, 3:10:18 AM).

The screenshot displays the ProQuest RefWorks web interface. At the top, the header shows 'ProQuest RefWorks' and the user's identity 'New York University Jane Doe'. Below the header is a toolbar with icons for adding documents, folders, sharing, citations, deleting, tagging, and searching. The left sidebar contains navigation options: 'All Documents', 'Search Databases', 'Last Imported', 'Sharing', 'My Folders', 'Add a folder', 'Not in Folder', 'Ecotourism' (selected), 'Biodiversity', 'Tags', and 'Search for tags'. The main content area shows a list of references, including 'Distribution of Economic Benefits from Ecotourism: A Case Study of ...' and 'Closing the ecotourism-conservation loop in the Peruvian Amazon'. The right sidebar provides details for the selected article, such as authors (CHRISTOPHER A KIRKBY, BRETT DAY, KERRY TURNER, SILVEIRA SOARES-FILHO, OLIVEIRA-RODRIGUES), journal name (Environmental Conservation), and publish date (March 1, 2011). Orange arrows point from external text labels to specific interface elements: 'Create citations and bibliographies' points to the citation icon; 'Search for references' points to the search icon; 'Import references from catalogs and databases' points to the 'Search Databases' option; 'Share references' points to the 'Sharing' option; 'Organize references with folders and tags' points to the 'My Folders' and 'Tags' sections; 'Edit references' points to the edit icon next to the article title; and 'Upload PDFs and their metadata' points to the PDF icon next to the selected article.

Abstract

The study aimed to identify the intracellular binding partner of a unique class of staphylococcal secreted exotoxins called superantigen-like proteins (SSL) from human macrophage and keratinocyte cell lysates. Here, we report that SSL1 specifically binds to human MAP kinase signaling protein ERK2. The binding of SSL1 to ERK2 was confirmed by pull-down assays and co-immunoprecipitation experiments. The binding of SSL1 to ERK2 was also confirmed by surface plasmon resonance (SPR) and isothermal titration calorimetry (ITC) experiments. The binding of SSL1 to ERK2 was also confirmed by molecular docking studies. The study provides a novel insight into the mechanism of action of SSL1 and may have implications for the development of novel anti-infective drugs.
